
Data Book

T_tAVDW_0521_EN - HFC R410A

t-AV DW

8-158 kW

Direct expansion air conditioners for IT Cooling.
Equipped with built-in water-cooled condenser.

The picture of the unit is indicative and may vary depending on the model

- Perimeter installation
- Fully hermetic ON/OFF compressors
- Single or double refrigerant circuit
- Air delivery from the bottom or from the top

- Plug fans with EC electric motor
- Electronic expansion valve
- Air suction temperature up to 40°C

GENERAL CHARACTERISTICS

UNDER
Downflow air delivery

OVER
Upflow air delivery

Air Conditioners for IT Cooling with built-in water-cooled condenser.

This series is offered in 22 models available in the following versions:

- The upflow version (Over) is characterized by air intake from the front through honeycomb grille and air delivery from the top of the unit.
- The downflow version (Under) is characterized by air intake from the top and air delivery from the bottom of the unit.

Cooling capacity: 8 ÷ 158 kW

The machines are made for indoor installation.

The constructive solutions and the internal lay-out allow high application flexibility and the frontal access to the main components for the inspection and routine maintenance.

The installation requires electrical and hydraulic connections.

Final assembly on all machines before shipment including running test, reading and monitoring of operating parameters, alarms simulation and visual check.

INSTALLATION

The series is particularly suitable for installation in Data Center of medium / small size with constant load.

DOWNFLOW VERSION (Under)

Typical installation is on the perimeter.

The units are placed along the perimeter of the Data Center. Air suction from the top of the unit and air delivery in the underfloor void.

The air distribution is achieved by special tiles placed in front of the racks row, forming cold aisle for air diffusion. On the rear of the racks is expelled the hot then aspirated by the unit.

For an optimal installation is advisable to provide the cold aisle containment.

Some solutions provide a service corridor around the server rooms where to place the units. In this case, it is necessary to provide the air intake plenum for each unit. With this solution, all the space in the Data Center is available for the installation of racks.

UPFLOW VERSION (Over)

The type of installation is practically similar to the previous. The only difference is that for the air distribution in the Data Center is not used the raised floor but ducts in the ceiling.

The series is also suitable for installation in UPS, Batteries, Distribution rooms and in all service areas of the Data Center that need a service of conditioning.

OPTIONAL

An extensive list of accessories allows the unit to adapt effectively to the real needs of the system, reducing the time and cost of installation.

PRODUCT FEATURES AND BENEFITS

- EER up to 5,76;
- New plug fans with EC electric motors and impeller in composite material, which guarantees a reduction of power consumption;
- Electronic expansion valve
- New fans electric motor that do not require maintenance;
- Improvement of the control software with advanced control logic;
- Single or double refrigerant circuit;
- Air suction temperature up to 40°C

F-GAS DIRECTIVE

The units highlighted in this publication contain <HFC R410A [GWP₁₀₀ 2088]> fluorinated greenhouse gases.

MODEL IDENTIFICATION

Air conditioners for IT Cooling

model: t-AV DW O 041 P1 S E4L

| | |
|-------------|---|
| t-AV | Series |
| DW | Unit type DW – direct expansion, water cooled |
| O | Air delivery O = over – upflow air delivery U = under – downflow air delivery |
| 041 | Model / Cooling capacity (kW) at nominal conditions |
| P1 | Compressor type and number P = scroll compressor for R410A 1 = number of compressors |
| S | Refrigerant circuit S = single D = double |
| E4L | Size |

THE RANGE

UNDER

E1 E2 E3 E4L E5L E6L E7L E8L E9L

OVER

E1 E2 E3 E4L E5L E6L E7L E8L

TRANSPORT AND STORAGE TEMPERATURE

During transport and if the machine is not installed at the reception, do not remove the packaging and place the machine in an enclosed, dry and protected from sunlight site at temperatures ranging between -30°C and 45°C in absence of superficial condensation.

WORKING LIMITS

ROOM AIR CONDITIONS

Room air temperature:

- 14°C minimum temperature with wet bulb.
- 24°C maximum temperature with wet bulb.
- 18°C minimum temperature with dry bulb
- 40°C maximum temperature with dry bulb.

AREA "A". Machine operating envelope.

Room air humidity:

- 20%RH minimum relative humidity.
- 60%RH maximum relative humidity.

WATER COOLED CONDENSER

Inlet water temperature:

- 6-20°C Inlet water temperature range – the 2-way valve optional for condensing control is required.
- 20-50°C Inlet water temperature range – without necessarily using the 2-way valve optional for condensing control.

Outlet water temperature:

- 25-55°C Outlet water temperature range

Operating ΔT:

- 4-20°C Operating ΔT between water inlet / outlet

All the values are indicative. The working temperatures are influenced by a series of variables as:

- Working conditions;
- Thermal load;
- Set of the microprocessor control.

HYDRAULIC CIRCUIT

- 10 Bar Maximum working pressure of the hydraulic circuit

POWER SUPPLY

- ± 10% Maximum tolerance of the supply voltage (V)
- ± 2% Maximum unbalancing of the phases.

MAIN COMPONENTS

FRAMEWORK

- Base in aluminium extrusion, painted with epoxy powders. Colour RAL 9005;
- Frame in aluminium profile, painted with epoxy powders. The inner frame is provided with seals for the panels. Colour RAL 9005;
- Panels in galvanized steel sheet with protective surfaces treatment in compliance with UNI ISO 9227/ASTMB117 and ISO 7253, and painted with epoxy powders. Colour RAL 7016 hammered;
- Panels insulated with polyurethane foam and seals to ensure air tight.
- Hinged front panels with quick release removal system.
- Total front access for routine maintenance.
- Removable lateral and back side panels.
- Air flow OVER version:
 - Air intake from the front through honeycomb type grille and air delivery from the top.
- Air flow UNDER version:
 - Air intake from the top and air delivery from the bottom.
- Compartment for electrical panel on unit front for direct access to control and regulation devices;

FILTER SECTION

- Washable air filters with COARSE 60% efficiency (according to ISO EN 16890), with cells in synthetic fibre and metallic frame.
- Air filters access:
 - OVER version
 - Frontal access for all machines
 - UNDER version
 - For machines size E1 – E2 – E3 frontal access
 - For machine size E4L – E5L – E6L – E7L – E8L – E9L access from upper side
- Clogged filters sensor with differential pressure switch on air side.

ON / OFF COMPRESSORS SECTION

Units size E1 and E2:

- Rotary vane compressors for R410A refrigerant
- 2-pole 3-phase electric motor with direct on line starting.
- Crankcase heater.
- Rubber supports.

Units size E3, E4L, E5L, E6L, E7L, E8L and E9L

- Scroll rotary compressors with spiral profile optimized for R410A refrigerant.
- 2-pole 3-phase electric motor with direct on line starting.
- Crankcase heater.
- Rubber supports.

FANS SECTION

The fan section is contained within the machine and includes:

- Centrifugal fans with backward curved blades with wing profile, single suction and without scroll housings (Plug-fans), directly coupled to external rotor electric motor.
- Impeller in composite material exempt from rust formation.
- Brushless type synchronous EC motor with integrated electronic commutated system and continuous variation of the rotation speed. The motor rotation control is obtained with the EC system (Electronic Commutation) that manage the motor according to the signal coming from the microprocessor control.
- Fans control through ModBus. In case of failure, the control stops the interested fan indicating the type of fault. The machine with more than one fan is not stopped.
- Adjustable External Static Pressure (ESP).
- Fan guard with rubber support (UNDER version)

COOLING SECTION

- Heat exchanger coil with internally corrugated copper tubes and high efficiency aluminium fins, specifically developed to provide high heat transfer and lower pressure drops.
- Frame in galvanized steel or peraluman.
- Condensate tray in peraluman with PVC flexible discharge pipe.
- Temperature sensor on air intake with control and regulation functions.
- Temperature sensor on air delivery with function of temperature display.
- Under floor water alarm through sensor to be placed on the floor.

CONDENSING SECTION

- Copper brazed plate type with cover plates, plates and connections in AISI 316 stainless steel.
- 0÷10V proportional signal to manage the condensing control system.

REFRIGERANT CIRCUIT

Components for each refrigerant circuit:

- Electronic expansion valve. The valve allows high performance and system efficiency thanks to a timely and accurate response to changes in temperature and pressure.
- Sight glass.
- Filter dryer on liquid line.
- Pressure transducers with indication, control and protection functions, on low and high refrigerant pressure.
- High pressure safety switch with manual reset.
- Liquid receiver.
- Pressure relief valve on liquid receiver for models 041 P1, 045 P1, 075 P2, 082 P2, 092 P2, 102 P2, 117 P4, 146 P4.
- Refrigerant circuit with copper tubing with anticondensate insulation of the suction line.
- R410A refrigerant charge and lubricant oil.

ELECTRICAL PANEL

In accordance with EN60204-1 norms, suitable for indoor installation, complete with:

- Main switch with door lock safety on frontal panel.
 - Magnetothermic switches for each compressor.
 - Magnetothermic switches for supply fans.
 - Contactors for each load. The supply fans equipped with EC electric motor don't require contactors.
 - Transformer for auxiliary circuit and microprocessor supply.
 - Numbered wirings.
 - Terminals:
- OUTLETS
- Voltage free deviating contact for General Alarm 1-2.
 - Voltage free contact for supply fans status.
 - Voltage free contact for smoke / fire sensor (the sensors are accessory)
- INLETS
- External enabling.
- Power supply 400/3+N/50.

CONTROL SYSTEM

Microprocessor control system with graphic display for control and monitor of operating and alarms status. The system includes:

- Built-in clock for alarms date and time displaying and storing;
- Built-in memory for the storing of the intervened events (up to 200 events recorded);
- Predisposition for additional connectivity board housing (MODBUS, LON, BACNET MS/TP RS485, BACNET OVER IP). The electronic cards are optional accessories.
- Main components hour-meter;
- Non-volatile "Flash" memory for data storage in case of power supply faulty;
- Menu with protection password;
- Demand Limit function (for machines with double refrigerant circuit only);
- LAN connection (max 15 units).

REMOTE DRY COOLERS

The descriptions of these series can be found in Chapter REMOTE DRY COOLERS

..... **Remote dry cooler:** Remote dry cooler with coil in copper tubes and aluminium fins and AC axial fans series: **T-MATE DC-A**

OPTIONAL ACCESSORIES

The descriptions of these additional components can be found in Chapter OPTIONAL ACCESSORIES.

| | |
|--------------------------------------|---|
| P121 | Front air intake + bottom panel. Unit base noise insulation with special bottom panel for OVER version. Restriction: Non-compatible with "P122 Bottom air intake + blind panels" for OVER version. |
| P122 | Bottom air intake+blind panels. Blind frontal panel for OVER version. The accessory allows the intake air from the bottom of the machine. Restriction: Not compatible with "P121 Front air intake + bottom panel" for OVER version. |
| 601 | Solenoid valve on liquid line. |
| P201 | Condenser + 2way ball valve. Condensing control with 2-way motorized valve, 0÷10 VDC control actuator and emergency manual control. |
| A548 | Constant prevalence. Automatic system for the air pressure control in the aisle. The system controls the supply fans rotation speed to keep constant the air pressure via a differential pressure transmitter connected to the microprocessor control. |
| P091 | Back-up module controller. The system guarantees the microprocessor power supply for a few minutes, in case of supply voltage failure. (size E1 excluded). |
| 383 | Numbered wirings + UK requests; |
| 4181 / 4182 / 4184 / 4185 ... | Serial cards: |
| | 4181 – Serial card MODBUS; |
| | 4182 – Serial card LON; |
| | 4184 – Serial card BACNET MS/TP RS485; |
| | 4185 – Serial card BACNET OVER IP. |
| A492 | Water leakage detector + additional sensor. Supplied in mounting kit. |
| A511 | Smoke detector. Supplied in mounting kit. |
| A521 | Fire detector. Supplied in mounting kit. |
| 5891 | Control unit via kiplink. |
| A35B | Graphic display "Evolution Touch" |
| A352 | No Display |
| P141 | Analogue set-point compensation. - Analogue set point compensation according to an external analogue signal at Customer care. |
| P181 | Network analyser (standard machine) Multifunction utility for calculating and displaying the machine electrical measurements. |
| P182 | Network analyser+optional (full optional machine) Multifunction utility for calculating and displaying the machine electrical measurements. |
| P183 | Kit network analyser (standard machine) Multifunction utility for calculating and displaying the machine electrical measurements. Supplied in mounting kit. |
| P184 | Kit network analyser+optional (full optional machine) Multifunction utility for calculating and displaying the machine electrical measurements. Supplied in mounting kit. |
| A812 (1) | Free-cooling direct control. |
| P131 | Hot water coil + 2-way valve. Hot water heating system. |
| A431 | Electric heater. Heating with electric heaters. |
| A432 | Extra power electric heater. Size E1, E2 excluded. |
| 4301 / 4303 / 4305 (2) | Humidification: Modulating steam humidifier with immersed electrodes with electronic control. |
| | 4301 - Steam humidifier 3kg/h |
| | 4303 - Steam humidifier 8kg/h |
| | 4305 - Steam humidifier 15kg/h |
| P051 (3) | Dehumidification function. |
| P161 | T/rH air intake sensor. Combined Temperature / Humidity sensor on air intake. The optional replace the standard temperature sensor on machine air intake. |
| 4666 | External air probe. External air temperature probe. |
| P071/P072/P073/P074 | Remote T/rH probe. Combined Temperature / Humidity sensor for remote installation. The optional is added to the standard temperature sensor on machine air intake. |

| | |
|---------------------------|--|
| P111 / P112 / P113 / P114 | Dual power supply. Dual power supply with automatic change-over. P111 - Dual power supply. P112 - Dual power supply + optional. P113 - Dual power supply kit. Supplied in mounting kit P114 - Dual power supply kit + optional. Supplied in mounting kit |
| A381 | Drain pump. Supplied in mounting kit. The system includes pump with activation float and 10 linear meters long discharge pipe. |
| P084 | Air filter ePM₁₀ 50%. Washable high efficiency air filter (according to ISO EN 16890). Not compatible with "P017 / P018 / P019 Plenum + filter ePM _{2,5} 50%, ePM ₁ 50%, ePM ₁ 85% (according to ISO EN 16890)". |
| A531 (4) | On-off damper. Non-return air damper with frame driven by electric servomotor installed on the machine air delivery. |
| P011 | Empty plenum. |
| P012 | Empty plenum CL.A1. Plenum with fire reaction in class "0" or "A1". (size E0 excluded). |
| P013 | Plenum + 3 grilles on three sides with double adjustable row. |
| P014 | Plenum + 3 grilles CL.A1. Plenum with grilles on three sides with double adjustable row, with fire reaction in class "0" or "A1". |
| P015 | Silenced plenum. Not compatible with "P084 Air filter ePM ₁₀ 50%". |
| P016 | Silenced plenum + 1 grille. Grille with double adjustable row on front side and sound absorbers. |
| P017 | Plenum + filter ePM_{2,5} 50%. Plenum with high efficiency air filter (according to ISO EN 16890). Not compatible with "P084 Air filter ePM ₁₀ 50%". |
| P018 | Plenum + filter ePM₁ 50%. Plenum with high efficiency air filter (according to ISO EN 16890). Not compatible with "P084 Air filter ePM ₁₀ 50%". |
| P019 | Plenum + filter ePM₁ 85%. Plenum with high efficiency air filter (according to ISO EN 16890). Not compatible with "P084 Air filter ePM ₁₀ 50%". |
| P031 (5) | Empty intake plenum. |
| P032 (5) | Empty intake plenum CL.A1. Plenum with fire reaction in class "0" or "A1". |
| P034 (6) | Intake free-cooling plenum. |
| P041 / P042 / P043 | Support frame with height adjusting rubber holders. Supplied in mounting kit. It is not possible to match the support frame with plenum installed under the machine. P041 – Support frame h 255-350mm P042 – Support frame h 355-450mm P043 – Support frame h 400-510mm |
| 3601 | Compressor operating signal contact. Voltage free contact for compressor status signalling. |
| 2411 | Phase sequence relay. Phases sequence control relay for the machine. |
| 1511 | Soft starter. Compressor motors soft-starter system (size E1, E2 excluded). |
| 3301 | Compressor rephasing. Compressors capacitor for power factor - cosφ 0,9 (sizes E1, E2 excluded). |
| A181 | Compressor soundproof jacket. Compressor soundproof jacket for a sound level reduction of 2 dB(A). |
| A272 | CL. 0 or A1 (EN 13501-1) insulation: Panelling with fire reaction in class "0" or "A1"; |
| P151 | Lowered display for Under – for UNDER units equipped with plenum under the unit. |
| 9973 | Wooden cage packing. The machines are delivered on wooden pallet, covered with shrink wrap and packaged in wooden cage. |
| B912 | Remote keyboard K200. Graphic display for remote installation, the optional is added to the standard graphic display placed on machine frontal panel. |

WARNING

The Manufacturers reserves the right to accept the matching of the optional installed on the machine.

MANDATORY COMBINATIONS OF ACCESSORIES

1. When optional accessory "A812 Free cooling direct control" is present, it requires mandatory accessories "P161 T/rH air intake sensor" and "4666 External air probe".
2. When optional accessories "4301 / 4303 / 4305 Steam humidifier" are present, they require mandatory accessory "P161 T/rH air intake sensor".
3. When optional accessory "P051 Dehumidification function" is present, it requires mandatory accessory "P161 T/rH air intake sensor".
4. When optional accessory "A531 On-off damper" is present, it requires mandatory accessory "9973 Wooden cage packing".
5. When optional accessories "P031 Empty intake plenum, for OVER version" and "P032 Empty intake plenum CL.A1, for OVER version" are present, they require mandatory accessory "P122 Bottom air intake+blind panels, for OVER version only"
6. When optional accessory "P034 Intake free-cooling plenum" is present, it requires mandatory accessories "P161 T/rH air intake sensor", "4666 External air probe", "A812 Free-cooling direct control" and "P122 Bottom air intake+blind panels, for OVER version only"
7. When accessory A352 "NO DISPLAY" is present, it requires mandatory accessory 5891 "Unit control via Kiplink"

The units highlighted in this publication contain <HFC R410A [GWP₁₀₀ 2088]> fluorinated greenhouse gas.

REFRIGERANT CIRCUIT

Below refrigerant diagrams for version with single or double refrigerant circuit. The diagrams refer to the standard configuration, without optional.

UNDER - SINGLE REFRIGERANT CIRCUIT

OVER - SINGLE REFRIGERANT CIRCUIT

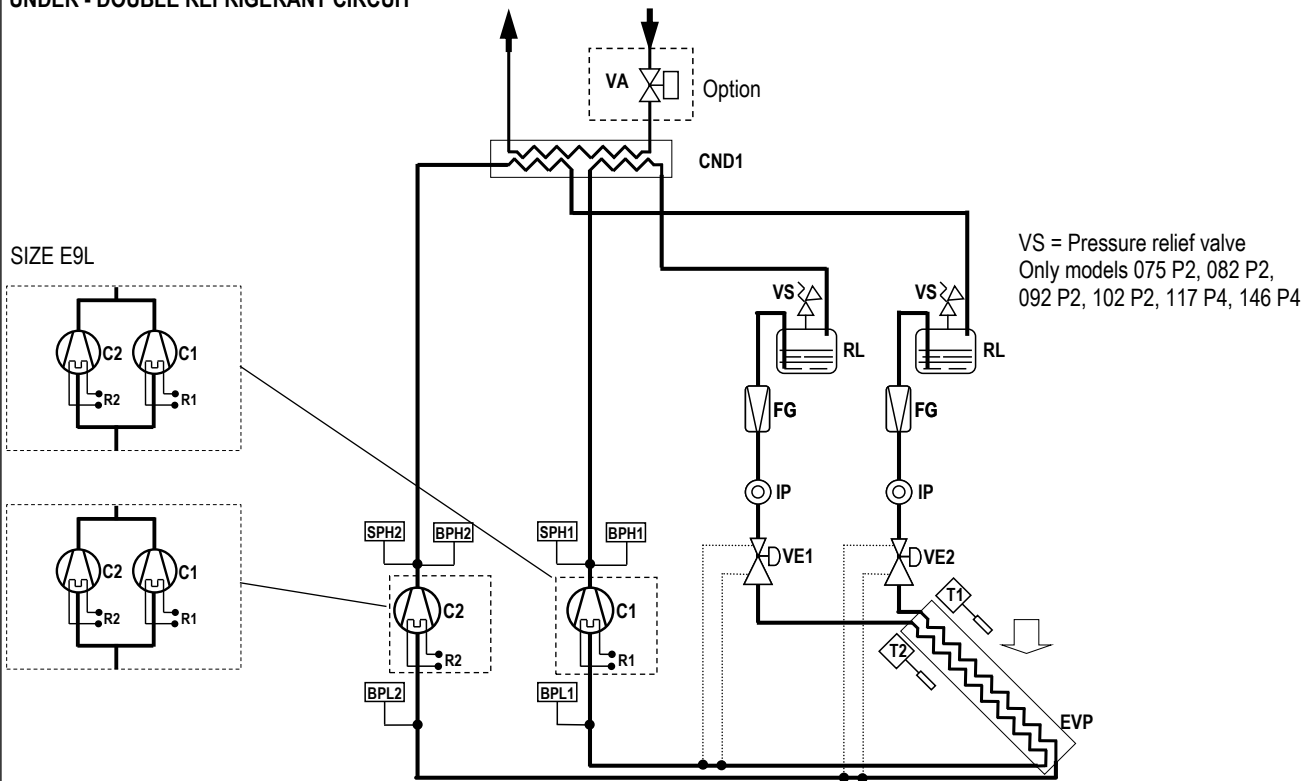

LEGENDA

- C1 Compressor
- R1 Crankcase heater
- CND Condenser.
- EVP Evaporator.
- BPH High pressure transducer.

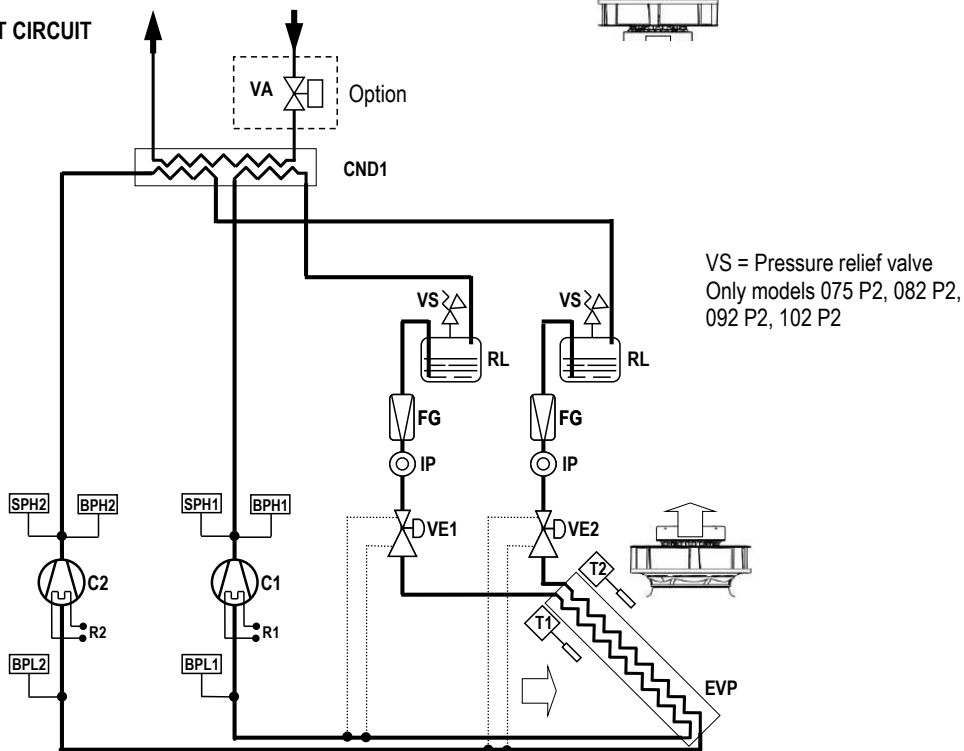

- BPL Low pressure transducer.
- SPH High pressure switch
- VS Safety valve.
- FG Refrigerant filter.

- IP Sight glass.
- VE Expansion valve.
- T Temperature probes.
- RL Liquid receiver
- VA Motorized valve for condensing control (option)

UNDER - DOUBLE REFRIGERANT CIRCUIT

OVER - DOUBLE REFRIGERANT CIRCUIT

LEGENDA

- C1...2 Compressor 1, 2
- R1...2 Crankcase heater 1, 2
- CND Condenser.
- EVP Evaporator.
- BPH High pressure transducer.

- BPL Low pressure transducer.
- SPH High pressure switch
- VS Safety valve.
- FG Refrigerant filter.

- IP Sight glass.
- VE Expansion valve.
- T Temperature probes.
- RL Liquid receiver
- VA Motorized valve for condensing control

PRESSURE RELIEF VALVE

The pressure relief valve of the refrigerant circuit is installed in the machines when required by Directive 2014/68/EU.
The valve is installed on liquid receiver of each refrigerant circuit of the machine with the purpose to protect the circuit from overpressure.

| Factory installed components | |
|--|-------|
| Pressure relief valve on liquid receiver | |

| 146 P4 D | 45,0 |

WATER QUALITY OF THE HYDRAULIC CIRCUITS

The values shown in the table must be guaranteed during the entire life cycle of the machine.

| | Description | Symbol | Range |
|----|---|--|------------|
| 1 | Hydrogen Ions | pH | 7.5 ÷ 9 |
| 2 | Presence of calcium (Ca) and magnesium (Mg) | Hardness | 4 ÷ 8.5 °D |
| 3 | Chlorine ions | Cl ⁻ | < 150 ppm |
| 4 | Iron Ions | Fe ³⁺ | < 0.5 ppm |
| 5 | Manganese Ions | Mn ²⁺ | < 0.05 ppm |
| 6 | Carbon dioxide | CO ₂ | < 10 ppm |
| 7 | Hydrogen sulphide | H ₂ S | < 50 ppb |
| 8 | Oxygen | O ₂ | < 0.1 ppm |
| 9 | Chlorine | Cl ₂ | < 0.5 ppm |
| 10 | Ammonia | NH ₃ | < 0.5 ppm |
| 11 | Ratio between carbonates and sulphates | HCO ₃ ⁻ /SO ₄ ²⁻ | > 1 |
| 12 | Sulphate ions | SO ₄ ⁻ | < 100 ppm |
| 13 | Phosphate ions | PO ₄ ³⁻ | < 2.0 ppm |

where: $1/1.78^{\circ}D = 1^{\circ}Fr$ with $1^{\circ}Fr = 10 \text{ gr CaCO}_3 / \text{m}^3$

ppm = parts for millions

ppb = part for billion

Explanatory notes:

- ref.1: A greater concentration of hydrogen ions (pH) than 9 implies a high risk of deposits, whereas a lower pH than 7 implies a high risk of corrosion.
- ref.2: The hardness measures the amount of Ca and Mg carbonate dissolved in the water with a temperature lower than 100°C (temporary hardness). A high hardness implies a high risk of deposits.
- ref.3: The concentration of chloride ions with higher values than those indicated causes corrosion.
- ref. 4 - 5 - 8: The presence of iron and manganese ions and oxygen leads to corrosion.
- ref.6 - 7: Carbon dioxide and hydrogen sulphide are impurities that promote corrosion.
- ref.9: Usually in water from the waterworks it is a value of between 0.2 and 0.3 ppm. High values cause corrosion.
- ref.10: The presence of ammonia reinforces the oxidising power of oxygen
- ref.11: Below the value shown in the table, there is a risk of corrosion due to the trigger of galvanic currents between copper and other less noble metals.
- ref.12: The presence of sulphates ions triggers corrosion phenomenon.
- ref.13: The presence of phosphates ions triggers corrosion phenomenon.

It is necessary to carry out periodic checks, with withdrawals at different points of the hydraulic system. During the first year of operation, checks are recommended every 4 months which can be reduced every 6 months starting from the second year of operation.

WARNING:

Values of the parameters outside the indicated ranges can lead to the formation of deposits and limescale and/or favour corrosive phenomena within the plant. For operating fluids other than water (mixtures of ethylene and propylene glycol) it is recommended to use specific inhibitors, designed to offer thermal stability within the operating temperature range and protection against corrosion. It is necessary that, in the presence of dirty and / or aggressive waters, an intermediate heat exchanger is installed upstream of the heat exchangers.

ANTIFREEZE MIXTURES

In plants that are not adequately protected by heating cables, protect the hydraulic circuit with an anti-freeze mixture when the ambient air temperature can drop below 5°C.

| | | | | | | | | | |
|---|----|---|----|----|-----|-----|-----|-----|-----|
| Minimum ambient air temperature | °C | 5 | 0 | -5 | -10 | -15 | -20 | -25 | -30 |
| ETHYLENE GLYCOL (suggested % in weight) | % | 0 | 12 | 20 | 30 | 35 | 40 | 45 | 50 |

| | | | | | | | | | |
|--|----|---|----|----|----|-----|-----|-----|-----|
| Minimum ambient air temperature | °C | 5 | 2 | -3 | -9 | -13 | -17 | -23 | -29 |
| PROPYLENE GLYCOL (suggested % in weight) | % | 0 | 10 | 20 | 30 | 35 | 40 | 45 | 50 |

The values are indicative and may significantly vary depending on the glycol manufacturer. Refer to your glycol supplier for detail. The values consider a precautionary difference of 5°C between the minimum ambient air temperature and the freezing temperature of the mixture.

In the hydraulic circuit do not send fluids other than water or mixtures with ethylene / propylene glycol.

If other products are provided, in addition to mixtures of water and ethylene or propylene glycol, contact the Manufacturer to check the compatibility with the machine components.

ACOUSTIC DATA

Acoustic data of the standard machine at full load working conditions.

WARNING:

In a closed room the noise produced by a sound source reaches the listener in two different ways:

- Directly
- Reflected from the surrounding walls, floor, ceiling, from furniture.

With the same sound source, the noise produced in a closed room is greater than that produced outdoors. In fact, the sound pressure level generated by the source, must be added to the one reflected from the room. Also, the shape of the room affects the sound.

1. U = Under, downflow / O = Over, upflow

WARNING:

The electric data indicated refer only to the indoor unit.

Optional accessory electric data are included within the dedicated chapters and must be added.

Please refer to ELCA WORLD selection program to calculate the electrical data of the air conditioner according to the requested optional accessories.

MICROPROCESSOR CONTROL SYSTEM

Controller

Keyboard and Display

The unit is equipped with the controller connected to a 6 keys keyboard with graphic display on which all information in English language or easily identifiable symbols are displayed. The controller disposes of a “flash” memory that preserves the information even in absence of power supply. Part of memory is dedicated to the registration of intervened events - up to 200 events. The system can manage up to 4 T/H probes on air intake, 4 T/H probes on air delivery, 4 remote T/H probes and a T/H probe for outdoor air.

DISPLAY – KEYBOARD FUNCTIONS

| | | |
|--|------------|--|
| | ALARM | Alarm presence with red light. Push for alarm description. In case of more alarms scroll by UP / DOWN. |
| | PRG | Menu list, scrolled by UP/DOWN: Unit; Set-point; In/Out; Clock; History; User; Service; Factory. ENTER to execute. |
| | ESC | Home. Used to come back to the previous menu level or to the main screen. |
| | UP DOWN | Changes pages and values of sets. By pressing in HOME mask, the synoptic of the main controls is displayed. |
| | ENTER | Moving the cursor on adjustable Program(s) fields to confirm the changes. Press ENTER to get out the fields. |

DISPLAY - MAIN MASK

The main mask shows time, date, room temperature and humidity values (if the relative probe is present) and areas for displaying operating and alarm status with dedicated icons:

- Area 1: Status of the unit: on / off
- Area 2: Status detail
- Area 3: Type of event (only in case of an event)
- Area 3_A: Code and type of event
- Area 4: Active cooling devices
- Area 5: Active free-cooling devices
- Area 6: Active humidity devices
- Area 7: Active heating devices
- Area 8: on / off parameters
- Area 9: BMS address
- Area 10: LAN address
- Area 11: Schematic representation of units
- Area 12: Active function presence icon

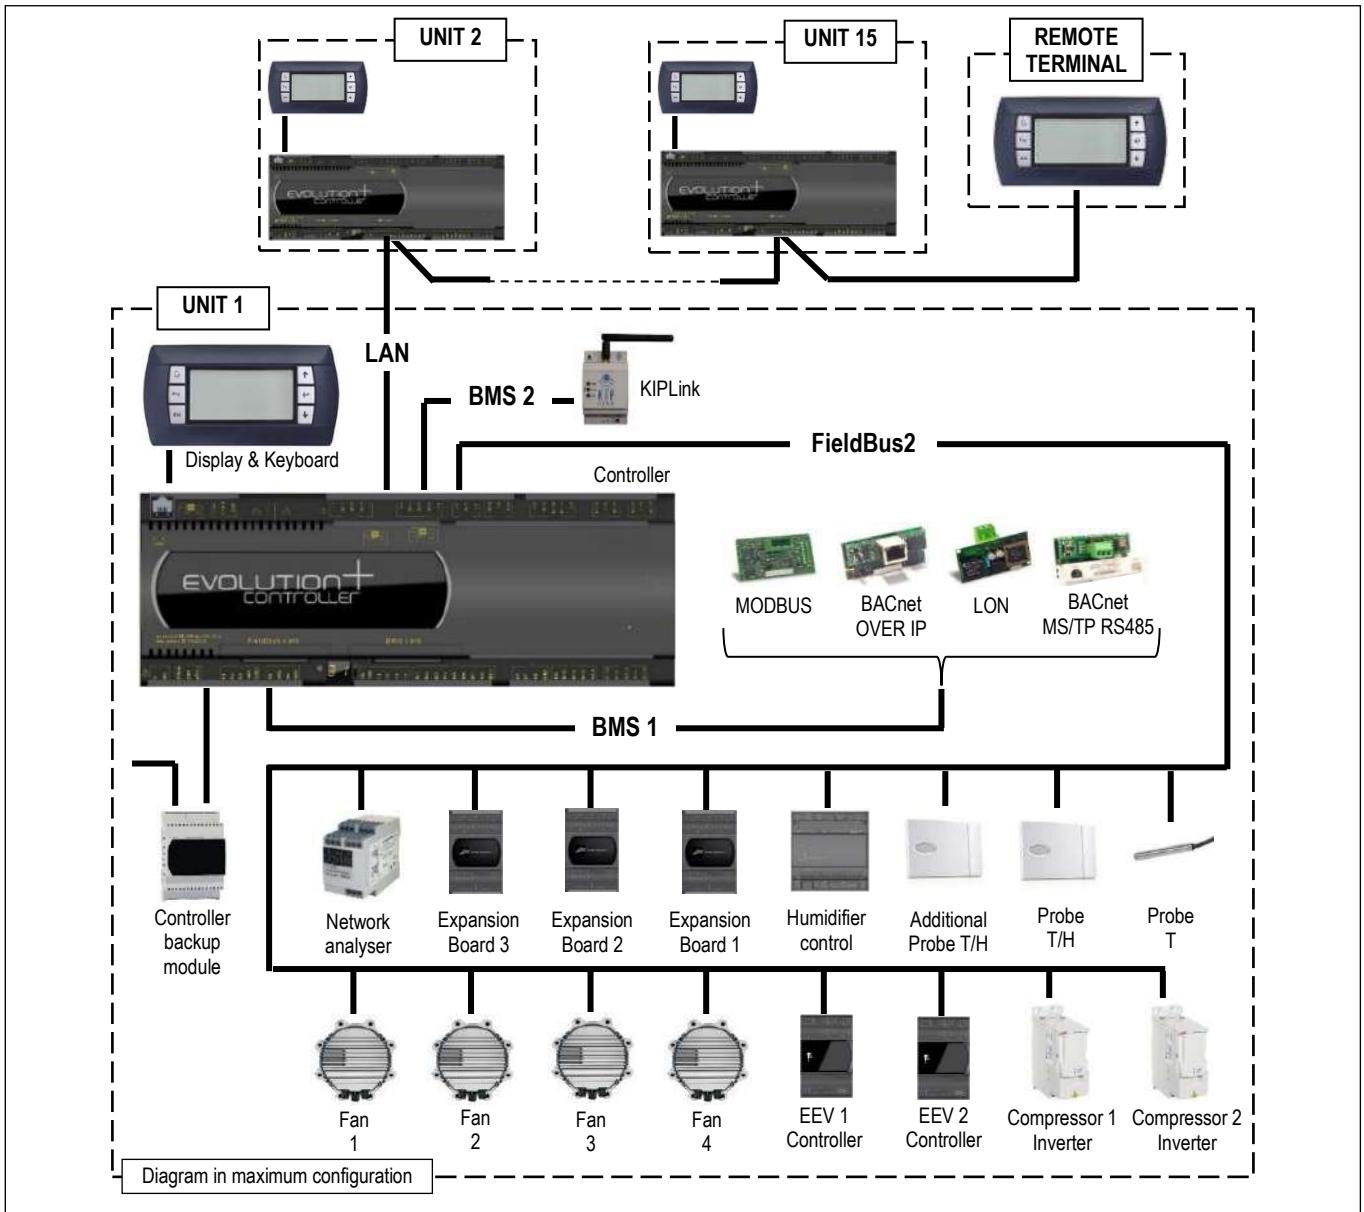

CONNECTIVITY

Through the optional serial port, the microprocessor control enables communication with the modern buildings BMS systems with the following protocols: MODBUS; LON; BACNET MS/TP RS485; BACNET OVER IP.

PASSWORD

- Level 1: On request of the End User. Allowing to reach USER menu
- Level 2: Asks to Service: Allowing to reach SERVICE menu
- Level 3: Asks to Service: Allowing to reach FACTORY menu
- No passwords request to enter: UNIT, SETPOINT, IN/OUT, CLOCK, HISTORY menu

LAN NETWORK

The LAN is part of the control software and it is possible to connect up to 15 units. This type of connection allows to control the units in coherent way, moreover the units can be controlled and managed from a shared remote terminal.

LAN ADDRESS LIST

| Units n. | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | Remote terminal |
|----------------------------|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|-----------------|
| Controller address | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | --- |
| Display & Keyboard address | 16 | 17 | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 | 32 |

The unit connection to the local network (LAN) allows to perform the following functions:

- Balancing the operating hours among the different units by rotating the reserve units.
- Turning on the reserve units in case other units should turn off due to an alarm, maintenance or power feed interruption.
- Turning on reserve units to offset the excessive thermal load.
- Operating with all units based on the average temperature and humidity values read by the temperature probes only in the operating units.
- DYNAMIC MASTER function that makes the role of the Master unit dynamic. In case of alarm, shutdown, maintenance, power failure, etc. on the Master unit, the function automatically elects a new Master unit.

DEMAND LIMIT

Demand Limit function is part of the control software for machines with double refrigerant circuit. It allows to limit the absorbed current of the machine.

The function must be activated and configured. A digital inlet on electrical panel connecting terminals allows the remote enabling of the function with an external signal without tension.

The software allows to select the resources to disable (compressors, electric heaters,...).

TEMPERATURE PROBE ON AIR RETURN / DELIVERY

Temperature probe installed on the air return and delivery.
Temperature control and regulation function on air return.

CLOGGED FILTERS SENSOR

The system includes a differential pressure switch installed in the electrical panel or in the front of the indoor unit and the plastic hoses for the relief of the pressure upstream and downstream the air filters.

Control range: 0.3 ... 4.0 mbar (30 ... 400 Pa)

Differential for intervention: 0.15 mbar (15 Pa)

FLOOD SENSOR

The system includes an electronic relay installed in the electrical panel of the machine and a water detector.

The electrical connections for the probe and the alarm contact are present in the machine's terminal board.

Sensor is supplied to be connected and installed at customer care.

POSSIBLE AIR INTAKE FOR OVER VERSIONS

OVER VERSION - AIR INTAKE FROM THE BOTTOM

Thanks to the particular basement design, it is possible to have the unit air intake from the bottom side. With this solution, it is necessary to foresee the optional blind frontal panels

OVER VERSION - AIR INTAKE FROM THE BACK SIDE

(Sizes E4L, E5L, E6L, E7L, E8L, E9L excluded)

It is possible to have the unit air intake from the back side.

Due to the limited size of the air intake, the air flow is limited to the 20% of the nominal one.

The air intake has to be made by Customer during installation.

In case the air intake is used for fresh air, it is necessary the temperature / humidity probe reposition in front of the heat exchanger, to allow for optimum reading of the values of temperature / humidity.

The electric cable of the probe has sufficient length for the repositioning.

AIR INTAKE FROM THE BACK SIDE

Back side view

OVER
E1 – E2 – E3

| SIZE | | E1 | E2 | E3 |
|--------------|-------------------|-----|------|------|
| A | mm | 510 | 645 | 945 |
| Max air flow | m ³ /h | 600 | 1000 | 1500 |

REMOTE DRY COOLERS

Remote dry coolers for matching to air conditioners for IT Cooling.
The constructive solutions allow high application flexibility.
Horizontal air flow, from coil to fan.
The series has an independent power supply from the indoor unit.
Among the indoor unit and the dry cooler is necessary the electrical connection of the condensing proportional control signal and the alarms.

T-MATE DC SERIES

T-MATE DC-A

T-MATE DC-A: Dry coolers equipped with axial fans and coil with copper tubes and aluminium fins. The machines are suitable for outdoor installation.
Equipped with AC axial fans.
The series is available in 3 versions:

- STD - No air flow and sound level reduction.
- LNO - Air flow reduction at 85% with consequent sound level reduction.
- ELN - Air flow reduction at 70% with further sound level reduction.

IMPORTANT

For further information about the units, please refer to "T-MATE DC" Data Book.

WARNING:

Please refer to ELCA WORLD selection program to calculate the technical data of the air conditioner according to the selected dry coolers in STD, LNO and ELN versions.

OPTIONAL ACCESSORIES: P121 – FRONT AIR INTAKE+BOTTOM PANEL

Available for OVER units.

The optional is not compatible with "P122 Bottom air intake+blind panels" for OVER units.

With this accessory, it is possible a noise insulation of the machine base, when the machine is installed directly on floor as raised floor, wood floor etc.

The accessory includes:

- Panel in galvanized steel sheet.
- Noise insulation with special soundproof material.

The bottom panel is supplied assembled inside the unit base and does not modify the unit dimensions.

**OPTIONAL ACCESSORIES: P122 - BOTTOM AIR INTAKE+BLIND PANELS**

Available for OVER units.

The optional is not compatible with "P121 Front air intake+bottom panel" for OVER units.

Thanks to the design of the basement is possible the air suction from the unit bottom. The air flow rate is the nominal one

The accessory foresees the blind frontal panels.

**OPTIONAL ACCESSORIES: 601 – SOLENOID VALVE ON LIQUID LINE**

The accessory has the function of closing the liquid line, in the event of the machine stopping or blackout, avoiding the risk of liquid refrigerant migration into the evaporator.

Recommended accessory for:

- Machines equipped with electronic expansion valve.

OPTIONAL ACCESSORIES: P201 - CONDENSER + 2WAY BALL VALVE

CND Condenser
VA Condensing control valve

The optional accessory, installed on the condenser outlet side, includes a 2-way motorized valve for condensing control with 0÷10 VDC control actuator and emergency manual control. The water flow control is achieved through a **2-way modulating ball valve with equal percentage flow control** ensured by the integrated characterizing disc.

This type of valve offers the following series of benefits:

- Equal percentage flow control.
- No peaks initial flow.
- Excellent stability control thanks to the integrated characterizing disc.
- Excellent characteristic in partialisation.
- Stability in control.
- Maintenance free.
- Self-cleaning.

CHARACTERISTICS OF THE 2-WAY BALL VALVE

- Closing seal with leakage rate in Class A (EN 12266-1)
- Maximum fluid pressure $P_s=1600\text{kPa}$
- Maximum closing pressure (Close-off) $\Delta P_s=1400\text{kPa}$

The rotative actuator is controlled by a signal 0 ... 10VDC from the microprocessor controller. The actuator is equipped with an emergency button for manual operation and is maintenance-free.

1. U = Under, downflow / O = Over, upflow

IMPORTANT

For further information, please refer to chapter "VALVE PRESSURE DROP CALCULATION AS FUNCTION OF WATER FLOW RATE"

OPTIONAL ACCESSORIES: A548 - CONSTANT PREVALENCE

The optional is a differential pressure sensor with a 0...20mA output signal. The device is installed in the machine.

The sensor is connected to the microprocessor control of the indoor unit and allows the control of:

A548 - CONSTANT PREVALENCE

The system controls the air pressure in the raised floor (Under version) or in the duct (Over version). Through the relief piping of the room pressure (low pressure side) and the air supply of the fan (high pressure side) the fan rotation speed is controlled to keep the air pressure constant. Pressure control range from 0 to 100 Pa.

OPTIONAL ACCESSORIES: P091 - BACK-UP MODULE CONTROLLER

The optional is installed within the electrical panel.
 The optional is not available for size E1.
 The system powers the microprocessor for a few minutes in the event of a power failure or voltage surges, preventing the re-boot of the controller.

OPTIONAL ACCESSORIES: 383 – NUMBERED WIRINGS + UK REQUESTS

The machine's electrical cables are all numbered for easy identification. For the power section it is possible to change the colour for the UK market.

| CABLE | 383 – COLOUR FOR UK |
|--------------|---------------------|
| EARTH | YELLOW / GREEN |
| NEUTRAL | BLUE SKY |
| PHASE 1 (L1) | BROWN |
| PHASE 2 (L2) | BLACK |
| PHASE 3 (L3) | GREY |
| AUXILIARIES | RED |

OPTIONAL ACCESSORIES: 4181 – SERIAL CARD MODBUS

The card is factory installed.
 Consult the Interface Manual for all technical information.

OPTIONAL ACCESSORIES: 4182 – SERIAL CARD LON

The card is factory installed.
 The manufacturer will supply the serial card and .NXE file and a .XIF files necessary for LonWorks technicians to configure the network.
 The board is programmed by the technician in charge of the integration.
 Consult the Interface Manual for all technical information.

OPTIONAL ACCESSORIES: 4184 – SERIAL CARD BACNET MS/TP RS485

The card is factory installed.
 The supervision network is set up by the technicians developing the BACnet interface.
 The Modbus protocol database is used for interfacing.
 Consult the Interface Manual for all technical information.

OPTIONAL ACCESSORIES: 4185 – SERIAL CARD BACNET OVER IP

The card is factory installed.
 The supervision network is set up by the technicians developing the BACnet interface. The Modbus protocol database is used for interfacing.
 The manufacturer will supply the card and .MIB file necessary for technicians to configure the network.
 The board is programmed by the technician in charge of the integration.
 Consult the Interface Manual for all technical information and what is necessary for Internet connection to view and modify variables.

OPTIONAL ACCESSORIES: A492 – WATER LEAKAGE DETECTOR + ADDITIONAL DETECTOR

The system includes an electronic relay installed in the electrical panel of the indoor machine and 2 water detectors to be connected in series.
The electrical connections for the probe and the alarm contact are present in the indoor machine's terminal board.
The sensors are supplied to be connected and installed at customer care.

OPTIONAL ACCESSORIES: A511 - SMOKE DETECTORS
OPTIONAL ACCESSORIES: A521 – FIRE DETECTORS

Is possible to install one or both of the following sensors. Sensors are supplied in mounting kit. Installation within the room at customer care.

A511 - SMOKE DETECTOR

The device is supplied in mounting kit.
The optical smoke detector senses the presence of combustion by-products (visible smoke) and activates an alarm.

The operating principle is based on the light scattering technique (Tyndall effect).

The device is in conformity to EN 54-7 standard.

Technical features:

| | | | |
|-----------------------|-------------------|---------------------|---------------------|
| Material | ABS | Relative humidity | <93% not-condensing |
| Power supply | 12...28 Vdc | Index of protection | IP 20 |
| Normal current | 50µA 24 Vdc | Testing by magnet | Yes |
| Alarm current | 25mA 24 Vdc | Relay | max. 1A 30Vdc |
| LED visibility | 360° (double led) | Signal repeater | 14mA 24 Vdc |
| Storage temperature | -10...+70°C | Covered area | 40m² max. |
| Operating temperature | -10...+70°C | Shielded connection | Min. 0.5 mm² |
| Max. speed air | 0.2 m/s | Colour | White |

Supplied with unit to be connected and installed at customer care close to the unit.

A521 - FIRE DETECTOR

The device is supplied in mounting kit.

The fire detector has been designed to identify temperatures at which fires may start. When the temperature exceeds the set threshold or when there is a rapid variation in temperature, the relay is activated to signal an alarm.

The device is in conformity to EN 54-5 standard.

Technical features:

| | | | |
|-----------------------|---------------------|---------------------|---------------|
| Material | ABS | Index of protection | IP 20 |
| Power supply | 12...28 Vdc | Testing by magnet | Yes |
| Normal current | 50µA 24 Vdc | Relay | max. 1A 30Vdc |
| Alarm current | 25mA 24 Vdc | Signal repeater | 14mA - 24 Vdc |
| LED visibility | 360° (double LED) | Alarm temperature | 62°C |
| Storage temperature | -10...+70°C | Covered area | 40m² max. |
| Operating temperature | -10...+70°C | Shielded connection | Min. 0.5 mm² |
| Relative humidity | <93% non-condensing | Colour | White |

Supplied with unit to be connected and installed at customer care close to the unit.

OPTIONAL ACCESSORIES: 5891 – CONTROL UNIT VIA KIPLINK

Logos, Trademarks and Company Name, are property of the respective Owners.

The optional is factory installed.

KIPLink is an innovative system based on Wi-Fi technology that allows to operate on a unit directly from Smartphone or Tablet via an APP.

WI-FI MODULE:

- Standard: IEEE 802.11n – 802.11g
- Frequencies: 2.4 – 2.4835 GHz
- Output power: <20 dBm (equivalent to <100mW)
- Safety: WPA2
- Flow: < 20m

MEHITS APP

- Operating System: Android 5® or higher, IOS 8® or higher, Windows 10® or higher
- Download: Google Play®, Apple Store® e Microsoft Store®.

HOW TO USE KIPLINK

KIPLink can be used in three ways:

Proximity keyboard:

Approaching the machine with a Smartphone or a Tablet with the MEHITS APP installed, you can connect to the machine via Wi-Fi and you can control it like the standard controller keyboard. It is possible to switch off / on the machine, change sets and reset alarms. Knowing the relative passwords, you access the parameters of the USER, SERVICE and MANUFACTURER menus.

Local Monitoring:

Using a Smartphone, a Tablet or PC connected to the LAN of the building where the machine is also connected. Access is via WEB via a browser. The system has two access profiles: ONLY READ and READ & WRITE.

ONLY READ allows only the visualization of the parameters and it is not possible to control the unit.

READ & WRITE allows you to switch off / on the machine, change sets and reset alarms. Knowing the relative passwords, you access the parameters of the USER, SERVICE and MANUFACTURER menus.

Remote monitoring:

Using a Smartphone, Tablet or PC connected to the VPN of the building where the machine is also connected, it is possible to operate and control from any geographical location where there is an internet connection. Use a secure VPN o avoid access by third parties that could compromise the operation of the machine. The cyber security is in charge of costumer.

DATA STORE

The system can store some data on a 1GB MicroSD card to be installed on the device. The data can be used for Service diagnostics. The card is not provided.

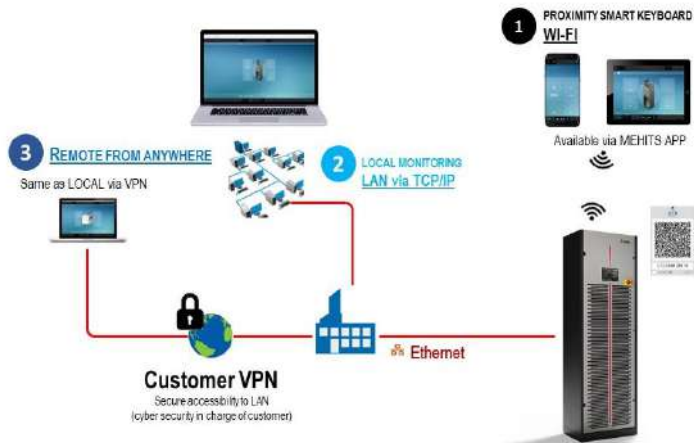

KIPLINK NETWORK

It is possible to set up mixed networks consisting of several KIPLink devices (10 maximum), to display information from different devices (called Client KIPLink) on one single device (called Master KIPLink).

The information is collected from the various Client KIPLink devices connected to EVOLUTION+ / W3000 TE/ CX-4 controllers and sent through the Wi-Fi or Ethernet network to the Master KIPLink device, which stores them and makes them available through an appropriate user interface.

The connection with the Master KIPLink can take place via Wi-Fi, via Ethernet or a combination of the two.

For complete information on the KIPLink system, please consult the relative technical documentation.

OPTIONAL ACCESSORIES: A35B – GRAPHIC DISPLAY “Evolution Touch”

The optional is factory installed.
 7” touch-screen graphic display with 16.7 million colors for the management and monitoring of operating and alarm status.
 The Display is equipped with a MicroUSB 2.0 port for the service connection.

The navigation bars are always present on the display to allow quick and intuitive navigation.

TOP NAVIGATION BAR

1. Status of connection with the controller. Green: connection OK; Red: connection Error
2. Time and date
3. External temperature value by dedicated probe
4. Active percentage of Cooling
5. Active percentage of Heating
6. Active percentage of Post-Heating
7. Unit active functions
8. Power meter readings
9. PGD1 keyboard emulator
10. Rapid access to the menu (Quick menu)

BOTTOM NAVIGATION BAR

11. Light bar for machine status identification
12. Alarm button to access the alarm management screen and the number of active alarms
13. Home button for returning to the Homepage
14. pLAN network
15. Temperature of outlet air or percentage of humidity.
16. Operating mode button.
17. Inlet air temperature
18. Unit status
19. On/Off button

DISPLAY AREA

20. Main menu
 - a. Operating mode and Set-Point
 - b. Circuits
 - c. Charts
 - d. Compressors

For complete information on Graphic Display system, please consult the relative technical documentation.

OPTIONAL ACCESSORIES: A352 - NO DISPLAY

The unit is supplied without display and adjustment is only possible with the KipLink accessory.

OPTIONAL ACCESSORIES: P141 – ANALOGUE SET-POINT COMPENSATION

Analogue set point compensation according to an external analogue signal at Customer care. The microprocessor control, through the additional module “expansion card”, can manage a compensation signal of the return air setpoint by analogue input (0...1V; 0...5V; 0,5...4,5V; 4...20mA; 0...20mA). The compensation curve allows to assign a temperature setpoint offset respectively to the minimum and maximum signal managed by the input.

OPTIONAL ACCESSORIES: P181 – NETWORK ANALYZER

OPTIONAL ACCESSORIES: P182 – NETWORK ANALYZER+OPTIONAL

OPTIONAL ACCESSORIES: P183 – KIT NETWORK ANALYZER

OPTIONAL ACCESSORIES: P184 – KIT NETWORK ANALYZER+OPTIONAL

INTERNAL installation

This device provides continuous measurement of power consumption, monitoring current, voltage and power. These values are sent to unit microprocessor via RS485 serial cable, as shown on the unit wiring diagram. The displayed variables are:

- Phase to phase voltage, only for three-phase units;
- Phase voltage (phase-neutral);
- Phase current;
- Neutral current only for three-phase units;
- Active phase power, only for three-phase units;
- Total active power;
- Active energy;
- Hour counts

INSTALLATION

| Frame | Power Supply | Installation | Code |
|-------|--------------|---------------------------------------|-----------------|
| E1 | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P183 / P184 (*) |
| E2 | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P183 / P184 (*) |
| E3 | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P183 / P184 (*) |
| E4L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P181 / P182 (*) |
| E5L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P181 / P182 (*) |
| E6L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P181 / P182 (*) |
| E7L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P181 / P182 (*) |
| E8L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P181 / P182 (*) |
| E9L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P181 / P182 (*) |

(*) P182, P184 for units with optional (with electric heaters and/or humidifier)

EXTERNAL installation

INTERNAL INSTALLATION

The optional is installed within the electrical box downstream the main switch with door safety lock and includes:

- Network transducer;
- Current transformers, one for each power supply phase cable.

MOUNTING KIT

The optional is supplied in box for external installation to the machine with the dimensions showed in the figure below, and includes:

- Main switch with door lock safety;
- Fuse;
- Network transducer;
- Current transformers, one for each power supply phase cable;
- Terminals.

OPTIONAL ACCESSORIES: A812 – FREE-COOLING DIRECT CONTROL

Preparation of the machine and the electrical panel for the direct free-cooling system "P034 Intake free-cooling plenum"

OPTIONAL ACCESSORIES: P131 – HOT WATER COIL+2WAY VALVE

The optional accessory is factory installed and don't modify the overall dimensions of the unit. Hot water heating system installed downstream the main cooling coil.

Components:

- Heat exchanger coil with internally corrugated copper tubes and high efficiency aluminium fins, specifically developed to provide high heat transfer and lower pressure drops.
- 2-way motorized valve for water flow regulation with 0÷10 VDC control actuator and emergency manual control.
- Temperature probe on water inlet.
- Frame in galvanized steel.

The hot water heating coil can be installed in combination with the "A432 electric heater". The operation is alternate with priority to the hot water heating coil.

For the water quality of the heating circuit, please refer to the chapter "WATER QUALITY OF THE HYDRAULIC CIRCUITS".

2-WAY BALL VALVE FOR HOT WATER FLOW CONTROL

The water flow control in the finned coil is achieved through a **2-way modulating ball valve with equal percentage flow control** ensured by the integrated characterizing disc.

This type of valve offers the following series of benefits:

- Equal percentage flow control.
- No peaks initial flow.
- Excellent stability control thanks to the integrated characterizing disc.
- Excellent characteristic in partialisation.
- Stability in control.
- Maintenance free.
- Self-cleaning.

CHARACTERISTICS OF THE 2-WAY BALL VALVE

- Closing seal with leakage rate in Class A (EN 12266-1)
- Maximum fluid pressure $P_s=1600\text{kPa}$
- Maximum closing pressure (Close-off) $\Delta P_s=1400\text{kPa}$

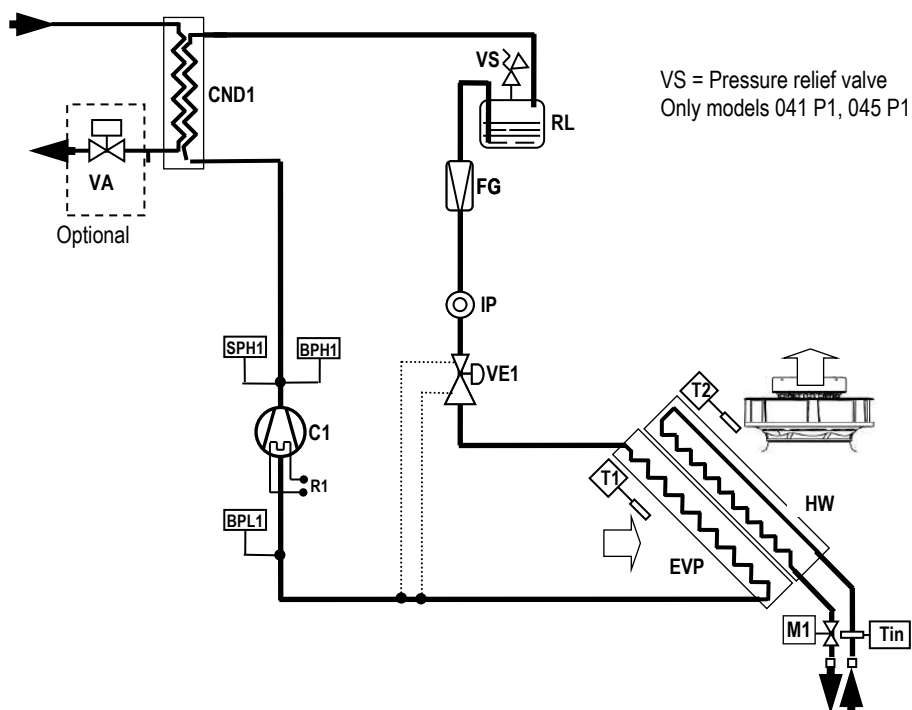

The rotative actuator is controlled by a signal 0 ... 10VDC from the microprocessor controller. The actuator is equipped with an emergency button for manual operation and is maintenance-free.

OPTIONAL ACCESSORIES: A431 – ELECTRIC HEATERS

OPTIONAL ACCESSORIES: A432 – EXTRA POWER ELECTRIC HEATERS

A431 –ELECTRIC HEATERS

Electric heater consisting of finned aluminium elements, ensuring low surface temperature and deleting the air ionization problems. The optional is installed downstream the main cooling coil.

In electric heaters with three working steps the activation is binary type.

Components:

- Electric heater in aluminium armoured elements with integral fins
- Electrical control
- Safety thermostat.

The electric heater can be installed in combination with the "P131 hot water coil + 2-way valve". The operation is alternate with priority to the hot water heating coil.

A432 - EXTRA POWER ELECTRIC HEATERS

The optional is not available for sizes E1, E2.

The components are the same of the standard accessory

It is not possible to combine the extra power electric heaters with the "P131 hot water coil + 2-way valve"

OPTIONAL ACCESSORIES: 4301 – STEAM HUMIDIFIER 3KG/H
OPTIONAL ACCESSORIES: 4303 – STEAM HUMIDIFIER 8KG/H
OPTIONAL ACCESSORIES: 4305 – STEAM HUMIDIFIER 15KG/H

Humidifier control board

Modulating steam humidifier with immersed electrodes fitted with safety and running accessories. The optional includes the control board.

The optional requires mandatory accessory "P161 T/rH air intake sensor". The optional is factory installed and requires only water filling connection.

Humidifier water charge and discharge pipes are not supplied.

It is recommended to install a filter and a shut-off valve on the pipe to the water inlet.

This humidifier produces non pressurized steam by electrodes immersed in the water inside the cylinder: they bring the electric phase in the water that works as an electrical resistance and overheats. The steam so produced is distributed with dedicated distributors and used for ambient humidification or for industrial processes.

CHARACTERISTICS OF THE SUPPLY WATER

The quality of the used water influences the evaporation process, so the humidifier can be fed with **not-treated water, only when potable and non-demineralised.**

LIMIT VALUES

| | | Min | Max |
|---------------------------------------|-------------------------------------|---------|-----|
| Hydrogen ions | pH | 7 | 8,5 |
| Specific conductivity at 20°C | $\sigma_{R, 20^\circ C}$ $\mu S/cm$ | 350 | 750 |
| Total dissolved solids | TDS mg/l | (1) | (1) |
| Dry residue at 180°C | R ₁₈₀ mg/l | (1) | (1) |
| Total hardness | TH mg/l CaCO ₃ | 100 (2) | 400 |
| Temporary hardness | mg/l CaCO ₃ | 60 (3) | 300 |
| Iron + Manganese | mg/l Fe + Mn | 0 | 0,2 |
| Chlorides | ppm Cl | 0 | 30 |
| Silica | mg/l SiO ₂ | 0 | 20 |
| Residual chlorine | mg/l Cl ⁻ | 0 | 0,2 |
| Calcium sulphate | mg/l CaSO ₄ | 0 | 100 |
| Metallic impurities | mg/l | 0 | 0 |
| Solvents, diluents, soaps, lubricants | mg/l | 0 | 0 |

(1) Values depending on specific conductivity; in general: TDS $\cong 0,93 * \sigma_{R, 20^\circ C}$; R₁₈₀ $\cong 0,65 * \sigma_{R, 20^\circ C}$

(2) Not lower than 200% of the chloride content in mg/l di Cl⁻

(3) Not lower than 300% of the chloride content in mg/l di Cl⁻

WARNING:

- Use only with drinking water.
- There is no reliable relationship between hardness and water conductivity
- Do not treat water with softeners! This could cause corrosion of the electrodes or the formation of foam, leading to potential operating problems or failures.
- Do not add disinfectants or corrosion inhibitors to water, as these substances are potentially irritant.
- Is absolutely forbidden to use well water, industrial water or water drawn from cooling circuits; in general, avoid using potentially contaminated water, either from a chemical or bacteriological point of view.

OPTIONAL ACCESSORIES : P051 – DEHUMIDIFICATION FUNCTION

The optional requires mandatory accessory "P161 T/rH air intake sensor".

Components:

- T / rH air intake sensor.
- Electronic control system of the dew point temperature for the combined intervention of cooling capacity and air flow.

OPTIONAL ACCESSORIES: P161 - T/RH AIR INTAKE SENSOR

P161: T/RH AIR INTAKE SENSOR

The accessory replaces the temperature sensor installed on the air intake in the unit and allows the displaying of the relative humidity room value

The sensor is mandatorily required with following option:

- 4301 / 4303 / 4305 Humidifier;
- P161 Dehumidification function;
- P034 Intake free-cooling plenum.

OPTIONAL ACCESSORIES: P071 / P072 / P073 / P074 - REMOTE T/RH PROBE

In addition to the on-board temperature probes, the unit's control can manage up to 4 remote T/RH probes (optional), to measure the return and the delivery air temperature in different positions.

Depending on the individual characteristics of the room and the cooling equipment, the customer can choose where to install the additional probes to achieve best measurement results (N. add. return probes + N. add. delivery probes ≤ 4).

The probes can be configured from the Service menu of the controller.

The probes that are enabled, contribute to the calculation of the return and delivery temperature used for capacity adjustment purposes.

The customer can choose between different types of calculation:

- Temperature of the first probe enabled
- Average temperature of the probes
- Highest temperature of the probes
- Lowest temperature of the probes.

Notes:

If a probe is connected but not enabled, its measurement can still be read on the display and by the BMS, but it is not used to calculate the adjustment temperature. It is possible to disable the probe on the unit and use only the remote probes for capacity adjustment purpose.

- **P071: One** Combined Temperature / Humidity sensor for remote installation.
- **P072: Two** Combined Temperature / Humidity sensors for remote installation.
- **P073: Three** Combined Temperature / Humidity sensors for remote installation.
- **P074: Four** Combined Temperature / Humidity sensors for remote installation.

OPTIONAL ACCESSORIES: 4666 – EXTERNAL AIR PROBE

The probe must be installed protected against atmospheric agent and allows the displaying of the external air temperature.

The sensor is mandatorily required with following option:

- P034 Intake free-cooling plenum.

OPTIONAL ACCESSORIES: P111 – DUAL POWER SUPPLY

OPTIONAL ACCESSORIES: P112 – DUAL POWER SUPPLY + OPTIONAL

OPTIONAL ACCESSORIES: P113 – KIT DUAL POWER SUPPLY

OPTIONAL ACCESSORIES: P114 – KIT DUAL POWER SUPPLY + OPTIONAL

The motorised changeover switches automatically manage changeover under load between two three-phase power supplies, or manually for emergency operations.

These devices are suitable for low voltage systems with interruption of the supply to the load during transfer.

The model supplied in the automatic version checks the source and switches over automatically, based on configurable parameters.

OPEN TRANSITION TYPE TRANSFER SWITCH WITH A MINIMUM INTERRUPTION OF THE SUPPLY DURING TRANSFER.

To maintain the microprocessor powered and avoid its restarts it is suggested the “P091 Back-up module controller” optional accessory. The back-up module guarantees the microprocessor power supply for a few minutes, in case of supply voltage failure.

INSTALLATION

| Frame | Power Supply | Installation | Code |
|-------|--------------|---------------------------------------|----------------|
| E1 | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P113, P114 (*) |
| E2 | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P113, P114 (*) |
| E3 | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P113, P114 (*) |
| E4L | 400/3+N/50 | EXTERNAL to the unit, supplied in kit | P113, P114 (*) |
| E5L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P111, P112 (*) |
| E6L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P111, P112 (*) |
| E7L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P111, P112 (*) |
| E8L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P111, P112 (*) |
| E9L | 400/3+N/50 | INTERNAL (on unit electrical panel) | P111, P112 (*) |

(*) P112, P114 for units with optional (with electric heaters and/or humidifier)

MOUNTING KIT

For EXTERNAL installation, the optional accessory is supplied in special box with IP 3X ingress protection, with the dimensions shown in the figure below.

OPTIONAL ACCESSORIES: A381 - DRAIN PUMP

A plastic case contains the vertical type pump, the water tank with float plus safety switch and hydraulic and electric connection.

Together the pump 10 linear meters anti-crushing plastic discharge spiral tube is supplied. The optional must be installed as shown in the documentation delivered together with the unit.

Wiring includes power supply and an alarm, displayed on microprocessor, that includes motor pump thermal protection and tank overflow.

The condensate discharge pump operation is fully automatic.

WARNING

For all the machines the optional accessory is supplied in mounting kit.

TECHNICAL DATA

- Power supply: 230V~ 50Hz
- Electrical data: 70W – 0,67A
- Maximum water flow: 500 l/h
- Maximum delivery height: 5.0 m
- Sound level: 45dBA a 1 m
- Maximum water temperature: 70°C
- Water acidity: pH>2.5
- Tray volume: 2.0 l
- Protection IP 20

CONDENSATE DISCHARGE PUMP

(Dimensions in millimetres)

OPERATING DATA

| Discharge head | Total length of discharge pipes (Ø 10 mm internal) | | | |
|----------------|--|-----|-----|-----|

| 5m | 30 | 20 | 0 | 0 |

OPTIONAL ACCESSORIES: P084 – AIR FILTER ePM₁₀ 50%

The ePM₁₀ 50% air filters (according to ISO EN 16890), replace the standard one.
The filters generate a pressure drops higher than the standard ones.
The filters are made of glass micro-fibre and are not regenerable.

OPTIONAL ACCESSORIES: A531 – ON-OFF DAMPER

Non-return air damper with frame driven by electric servomotor.
 Accessory installed on units air delivery and it can be matched to plenums and floor stand.
 The accessory requires mandatory accessory "9973 Wooden cage packing".

FRAMEWORK

- Frame in galvanized steel sheet with protective surfaces treatment in compliance with UNI ISO 9227/ASTMB117 and ISO 7253, and painted with epoxy powders. Colour RAL 9005;
- Opposed blade dampers in galvanized steel sheet.
- Actuator for damper control.
- Terminals for electric connection to the unit.

 2. Add this value to the total unit weight

INSTALLATION EXAMPLE

WORKING LOGIC

The damper opens at supply fans activation to allow air flow.

When the fans stop for failure or stop command, the damper closes, preventing air flow into the unit.

OPTIONAL ACCESSORIES: P011 - EMPTY PLENUM

OPTIONAL ACCESSORIES: P012 - EMPTY PLENUM CL.A1

OPTIONAL ACCESSORIES: P031 - EMPTY INTAKE PLENUM

OPTIONAL ACCESSORIES: P032 - EMPTY INTAKE PLENUM CL.A1

OPTIONAL ACCESSORIES: P013 - PLENUM + 3 GRILLES

OPTIONAL ACCESSORIES: P014 - PLENUM + 3 GRILLES CL.A1

OPTIONAL ACCESSORIES: P015 - SILENCED PLENUM

OPTIONAL ACCESSORIES: P016 - SILENCED PLENUM + 1 GRILLE

OPTIONAL ACCESSORIES: P017 - PLENUM + FILTER EPM2.5 50%

OPTIONAL ACCESSORIES: P018 - PLENUM + FILTER EPM1 50%

OPTIONAL ACCESSORIES: P019 - PLENUM + FILTER EPM1 85%

The optional is supplied separately and the installation on the unit is at Customer care.
The plenums have same technical characteristics and base dimensions of the machine cabinet.

It is possible to install only a single plenum to ensure stability to the unit.

FRAMEWORK

- Frame in aluminium extrusion, painted with epoxy powders. Colour RAL 9005;
- Panels in galvanized steel sheet with protective surfaces treatment in compliance with UNI ISO 9227/ASTMB117 and ISO 7253, and painted with epoxy powders. Colour RAL 9005;
- Panels insulated with polyurethane foam and seals to ensure air tight.
- Panels fixed with screws.
- Removable panels.
- Set of fixing elements to fasten the plenum to the unit.

WARNING

In UNDER version units the piping is inside the machine.

The air delivery plenums sometime don't allow the extension of the pipes downwards.

In special cases, to keep the connections inside the machine, foresee a plenum 200mm higher than the standard one.

P011 / P012 – P031 / P032: EMPTY PLENUM

The plenum is void and can be used to rise the intake/delivery air inlet/outlet.

Remove the frontal panels for inspection.

Also available with fire reaction in class "0" or "A1" (EN 13501-1).

The optional accessories "P031 Empty intake plenum, for OVER version" and "P032 Empty intake plenum CL.A1, for OVER version" require mandatory accessory "P122 Bottom air intake+blind panels, for OVER version only".

P013 / P014: PLENUM + 3 GRILLES

The plenum must be installed on air delivery.

The plenum allows the air distribution directly into the room. The plenum is supplied with air distribution grilles with double row adjustable grilles on front and lateral side.

Also available with fire reaction in class "0" or "A1" (EN 13501-1).

P015: SILENCED PLENUM

The plenum must be installed on air delivery.
The plenum is fitted with noise absorption partitions to reduce the noise emission.
Remove the frontal panels for inspection.

OPTIONAL ACCESSORIES: P034 – INTAKE FREE-COOLING PLENUM

The optional is supplied separately and the installation on the unit is at Customer care.
 The optional requires mandatory accessories "P161 T/rH air intake sensor", "4666 External air probe", "A812 Free-cooling direct control" and "P122 Bottom air intake+blind panels, for OVER version only".
 The plenums have same technical characteristics and base dimensions of the machine cabinet.
 The optional allow to obtain free-cooling by direct ambient air intake into the room.
 The dampers are proportionally managed by the microprocessor control, that regulates the quantity of the ambient air to put in the room per the set-point.

COMPONENTS

- Frame in aluminium extrusion, painted with epoxy powders. Colour RAL 9005;
- Panels in galvanized steel sheet with protective surfaces treatment in compliance with UNI ISO 9227/ASTMB117 and ISO 7253, and painted with epoxy powders. Colour RAL 9005;
- Panels insulated with polyurethane foam and seals to ensure air tight.
- Removable panels with screws.
- Opposed blade dampers in galvanized steel sheet and safety grille for ambient air and room air suction.
- Actuator for each damper.
- Terminals for electric connection to the unit.
- Set of fixing elements to fasten the plenum to the unit.
- T / rH air intake sensor. The sensor must be moved outside the air conditioners for a proper read of the room temperature value.
- External air probe. The sensor must be installed in the outdoor air suction duct or anyway protected against atmospheric agent.
- Free contact for free-cooling operating status monitoring.
- Terminals on indoor unit for:
 - 24 Vac power supply for the overpressure damper servomotor
 - 0-10Vdc control signal for the servomotor

INSTALLATION EXAMPLE

Ducting for ambient air suction are at Customer care.
 A rain cover with grille on ambient air intake is recommended.

AIR EXHAUSTION DAMPER – Not supplied

WARNING

IT IS COMPULSORY TO INSTALL IN THE ROOM TO BE CONDITIONED A MOTORIZED DAMPER APPROPRIATELY DIMENSIONED FOR THE EXHAUSTION OF AIR FROM THE ROOM DURING FREE-COOLING OPERATION.

During free-cooling operation, the air conditioner supplies ambient air directly into the room, this causes an increase in air pressure inside the room.

The exhaustion damper avoids the increase in pressure in the room.

The damper must be installed at the highest point of the room to exhaust excess hot air to the outside.

Install the damper if possible, in opposite position to air conditioner.

The damper is controlled by the modulating signal 0-10Vdc of the free-cooling control of the air conditioner. The 24Vac power supply of the servomotor and the 0-10Vdc free-cooling signal is available on the unit's electrical terminal block (see wiring diagram for connections).

Air exhaustion must be protected with a rain cover and a grille (at Customer care).

The electrical connection cables are not supplied.

OPTIONAL ACCESSORIES: P041 – SUPPORT FRAME H 255-350MM

OPTIONAL ACCESSORIES: P042 – SUPPORT FRAME H 355-450MM

OPTIONAL ACCESSORIES: P043 – SUPPORT FRAME H 400-510MM

The accessory is supplied as an assembly kit.
It is not possible to match the unit floor stand with plenum installed under the machine.
The floor stand is available in 3 different heights.

OPTIONAL ACCESSORIES: 3601 – COMPRESSOR OPERATING SIGNAL CONTACT

A voltage free electrical contact is supplied for remote signalling "Compressor operation".
Electrical connection on the machine's terminal board.

OPTIONAL ACCESSORIES: 2411 – PHASE SEQUENCE RELAY

The system checks that the phase sequence of the power supply is correct to prevent the opposite rotation of the three phase electric motors of the machine as compressors. The optional is installed in the electrical box downstream the main switch with door lock safety and in case of wrong phase sequence prevents starting the machine.

OPTIONAL ACCESSORIES: 1511 – SOFT STARTER

The optional is not available for size E1, E2. Compressor motors soft-starter system. The system is contained in the electrical box. Its function is to reduce the starting current of the motor with a monitored start.

The reduction of the starting current produced by soft starter optional accessory reduces the stress on the power line and on the compressors contributing to increase the components lifetime.

1. U = Under, downflow / O = Over, upflow

OPTIONAL ACCESSORIES: 3301 – COMPRESSOR REPHASING

Compressors capacitor for power factor - $\cos\phi$ 0,9 (sizes E1, E2 excluded).

OPTIONAL ACCESSORIES: A181 – COMPRESSOR SOUNDPROOF JACKET

A soundproof jacket for each compressor to obtain a reduction of 2dB(A) of the sound level of the unit.

OPTIONAL ACCESSORIES: A272 – CL.0 or A1 (EN13501-1) INSULATION

The optional is designed **TO SUPPLY THE PANELING ONLY WITH FIRE REACTION IN CLASS “0” OR “A1 (EN 13501-1)”**; furthermore allows a noise insulation of the panels of the air conditioners. The pressure level reduction of the unit is about 2 dB(A). The reduction refers **ONLY** to the sound level radiated from the unit or in front of the unit. The noise level data on return and delivery air do not undergo reductions.

The accessory includes:

- External part as standard panel.
- Internal part in galvanized steel sheet.
- The inside noise insulation with special soundproof material.

REACTION TO FIRE CLASSIFICATION

On Italian territory, the classification is per the D.M. of June 26, 1984 and subsequent amendments, providing for a sort in "Classes" from 0 (non-combustible material) to 5 (extremely flammable material). The EN 13501-1 regulation is ordered in classes from A1 (non-combustible material) to F (extremely flammable material).

A comparison of the classes is not possible because the methods and evaluation criteria are completely different. The comparison table below is being considered purely indicative.

| Definition | Italian classes | EN 13501-1 |
|---|-----------------|------------|
| Non-combustible material | Class 0 | A1 |
| Combustible material, very limited contribution to fire | Class 1 | A2 – B |
| Combustible material, limited contribution to fire | Class 2 | A2 – B - C |
| Combustible material, medium contribution to fire | Class 3 | C – D |
| Combustible material, highly contribution to fire | Class 4 | E |
| Combustible material, easily flammable | Class 5 | F |

Is possible to provide the sandwich panels for the OVER units with air flow from the top.

This implies that the air intake must necessarily be from the base of the unit with front blind paneling.

The accessory increases the unit weight:

| OVER | | | | | | | | | | |

1. Add this value to the total unit weight

OPTIONAL ACCESSORIES: P151 – LOWERED DISPLAY FOR UNDER

For machines installed above the supply plenum.

The display / keypad on the front panel of the machine is installed lowered by about 50cm to facilitate consultation and use.

EXAMPLE FOR MACHINES NOISE EMISSION CALCULATION

UNDER MACHINE WITH DUCT ON AIR INTAKE

- Lp A = Front side Under catalogue value
- Lp B = Air delivery Under catalogue value
- Lp C = Air intake Under catalogue value
- The points B and C do not influence the point A

UNDER MACHINE WITH PLENUM ON AIR DELIVERY

- Lp A = Front side Under catalogue value
- Lp B = Air delivery Under catalogue value – plenum noise reduction
- Lp C = Air intake Under catalogue value
- $Lp A+C = 10 \log_{10} \left(10^{\frac{LpA}{10}} + 10^{\frac{LpC}{10}} \right)$
- The point B do not influence the point A

UNDER MACHINE WITH PLENUM ON AIR INTAKE

- Lp A = Front side Under catalogue value
- Lp B = Air delivery Under catalogue value
- Lp C = Air intake Under catalogue value – plenum noise reduction
- $Lp A+C = 10 \log_{10} \left(10^{\frac{LpA}{10}} + 10^{\frac{LpC}{10}} \right)$
- The point B do not influence the point A

OVER MACHINE WITH DUCT

- Lp A = Air intake Over catalogue value
- Lp B = Air delivery Over catalogue value
- The point B do not influence the point A

EXAMPLE FOR MACHINES NOISE EMISSION CALCULATION

OVER MACHINE WITH PLENUM ON AIR DELIVERY

Lp A = Air intake Over catalogue value

Lp B = Air delivery Over catalogue value – plenum noise reduction

$$Lp A+B = 10 \log_{10} \left(10^{\frac{LpA}{10}} + 10^{\frac{LpC}{10}} \right)$$

OVER MACHINE WITH DUCT AND PLENUM ON AIR DELIVERY

Lp A = Front side Over catalogue value

Lp B = Air delivery Over catalogue value

Lp C = Lp A + 6dB(A) – plenum noise reduction

$$Lp A+C = 10 \log_{10} \left(10^{\frac{LpA}{10}} + 10^{\frac{LpC}{10}} \right)$$

The point B do not influence the point A+C

OVER MACHINE WITH DUCT AND PLENUM ON AIR DELIVERY

Lp A = Front side Over catalogue value

Lp B = Air delivery Over catalogue value

Lp C = Lp D = Lp A + 6 dB(A) – plenum noise reduction

The points B, C and D do not influence the point A

IMPORTANT

The declared noise levels are intended in free field conditions.

The noise pressure level of an installed unit is affected by the room acoustic characteristics.

Please consider an average noise increase of +4/+6 dB(A).

VALVE PRESSURE DROP CALCULATION AS FUNCTION OF WATER FLOW RATE

Flow coefficient k_v defines the water flow (between 5°C and 40°C) expressed in m³/h that cross a valve with a pressure drop of 1bar (100kPa).

With this data is possible to calculate the localized pressure drop as function of the water flow rate.

$$\Delta P = (Q / k_v)^2$$

ΔP (bar) = localized pressure drop of valve;

Q (m³/h) = water flow rate – it varies according to the desired operating condition;

k_v (m³/h) = valve flow coefficient.

The formula allows to calculate the value of the localized pressure drop (in bar).

The pressure drops values showed on the documentation are supplied in kPa.

Is possible to change from one unit to another through the following conversion.

$$1 \text{ bar} = 100\text{kPa}$$

CALCULATION EXAMPLE OF CONDENSING CONTROL VALVE PRESSURE DROP IN FUNCTION OF CONDENSER WATER FLOW RATE.

Model 092 P2 D E8L

Example at nominal conditions. Characteristics referred to entering air at 26°C-40%UR; water to the condenser 30-35°C

Condenser water flow rate: 19,5 m³/h

Condenser pressure drop 20 kPa

Valve flow coefficient k_v : 25 m³/h

Condensing control valve pressure drop: $\Delta P = (Q / k_v)^2 = (19,5 / 25)^2 = 0,608 \text{ (bar)} * 100 \text{ (kPa / bar)} = 60,8 \text{ kPa}$

Pressure drop (condenser + valve) = 16 + 61 = 77 kPa

AIR FILTERS REPLACEMENT

FOR UNDER VERSION MACHINES SIZE E4L – E5L – E6L – E7L – E8L – E9L

SHIPMENT: PACKING DIMENSIONS

Values referred to basic machine. The presence of some accessories increases the weight of machine.

The machines are shipped on pallet and covered with shrink wrap.
On request packing on pallet covered with shrink wrap and wooden cage.
