# BVE2 DX

12-146 kW

Air cooled condensers for IT Cooling with axial fans.  
Outdoor installation.

The picture of the unit is indicative and may vary depending on the model

- Operation with outdoor temperature up to 52°C
- Outdoor installation
- Condensing coil in copper tubes and finned aluminium pack
- Axial fans with AC (DX-A) or EC (DX-E) electric motor
- 2 sounds levels
- Refrigerant R410A
- 50Hz or 60Hz power supply

## GENERAL CHARACTERISTICS

Air cooled condenser for IT Cooling with axial fans and horizontal air flow.  
Air flow from coil to fan.  
Condensers are supplied with seal charge; the refrigerant charge must be carried out.  
Frame for outdoor installation.  
The constructive solutions allow high application flexibility.  
50Hz or 60Hz versions.  
15 models with capacity from 12 to 146 kW.  
The series has an independent power supply from the indoor unit.  
Among the indoor unit and the condenser is necessary the refrigerant connection and electrical connection of the condensing proportional control signal and the alarms.

## PRODUCT FEATURES AND BENEFITS

- Operation with outdoor temperature up to 52°C;
- Suitable for any type of plant;
- Structure in galvanized and painted steel;
- Reduced dimensions and weight to facilitate handling and installation;
- Independent power supply from the indoor unit;
- Horizontal air flow from coil to fan. On request vertical air flow;
- 2 sound levels and quiet operation particularly suitable for applications in urban areas;

## F-GAS DIRECTIVE

**The units highlighted in this publication contain HFC R410A [GWP<sub>100</sub> 2088] fluorinated greenhouse gases.**

## WORKING LIMITS

### AMBIENT AIR TEMPERATURE

52°C	Maximum ambient air temperature for units equipped AC/EC fans.
-20°C	Minimum ambient air temperature for units equipped AC fans.
-35°C	Minimum ambient air temperature for units equipped EC fans.
-45°C	Minimum ambient air temperature for units equipped AC fans and optional "P172 Kit for air -45°C axial AC".

### POWER SUPPLY

230 V ± 10%	Maximum tolerance of the supply voltage for single-phase version with AC motors.
200 V ÷ 277 V	Power supply range for single-phase version with EC motor.
380 V ÷ 460 V	Power supply range for three-phases version with EC motor.
50 Hz / 60 Hz	Power frequency for all versions with EC motor.
± 2%	Maximum unbalance between the phases only for fans with EC motor.

## TRANSPORT AND STORAGE TEMPERATURE

During transport and if the machine is not installed at the reception, do not remove the packaging and place the machine in an enclosed, dry and protected from sunlight site at temperatures ranging between -45°C and 60°C in absence of superficial condensation.

# BVE2 DX

## MODEL IDENTIFICATION

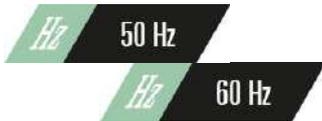

<b>BVE2</b>	<b>DX-A B M 14</b>
<b>BVE2</b>	Air cooled condensers
<b>DX-A</b>	Series with axial fans with AC electric motor
<b>DX-E</b>	Series with axial fans with EC electric motor
<b>B</b>	Sound level B = standard L = extremely low noise
<b>M</b>	Power supply M = Single-phase T = Three-phases
<b>14</b>	Capacity (kW)

## AVAILABLE SERIES

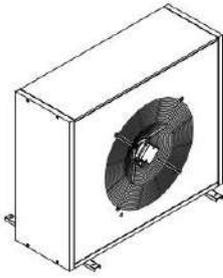

<b>BVE2 DX-A B</b>	Remote condenser equipped with AC fan Standard acoustic version Power supply 230V / 1Ph / 50Hz
<b>BVE2 DX-A L</b>	Remote condenser equipped with AC fan Extremely low noise acoustic version Power supply 230V / 1Ph / 50Hz

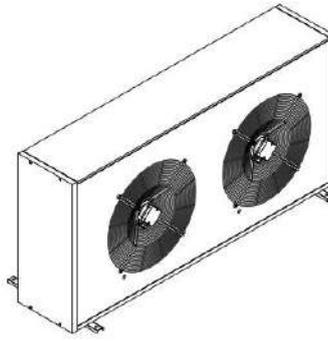

<b>BVE2 DX-E B</b>	Remote condenser equipped with EC fan Standard acoustic version Power supply 200-277V / 1Ph / 50-60Hz for "M" models Power supply 380-460V / 3Ph / 50-60Hz for "T" models
<b>BVE2 DX-E L</b>	Remote condenser equipped with EC fan Extremely low noise acoustic version Power supply 200-277V / 1Ph / 50-60Hz for "M" models Power supply 380-460V / 3Ph / 50-60Hz for "T" models

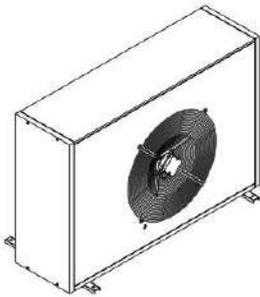

## AVAILABLE MODELS

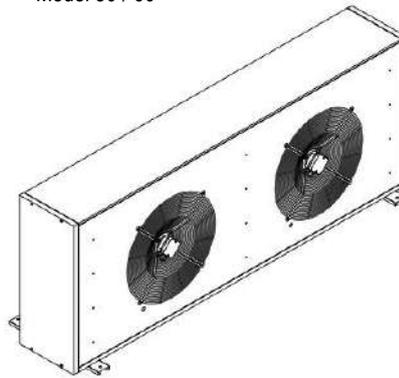

Model 11 / 14

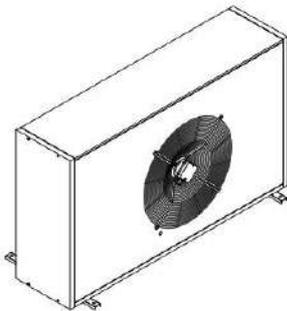

Model 50 / 60

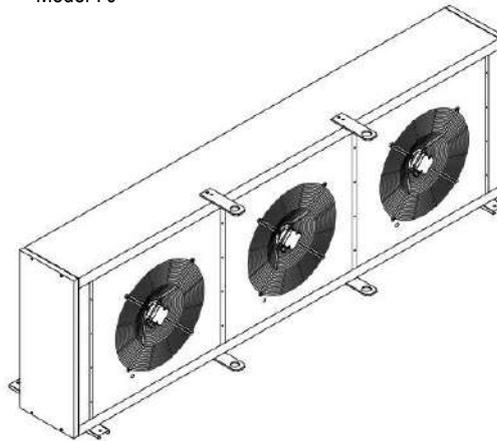

Model 17 / 20

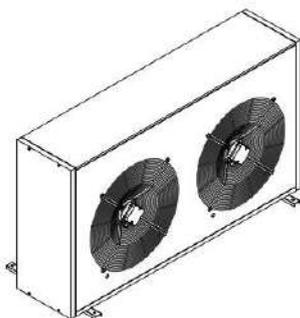

Model 70

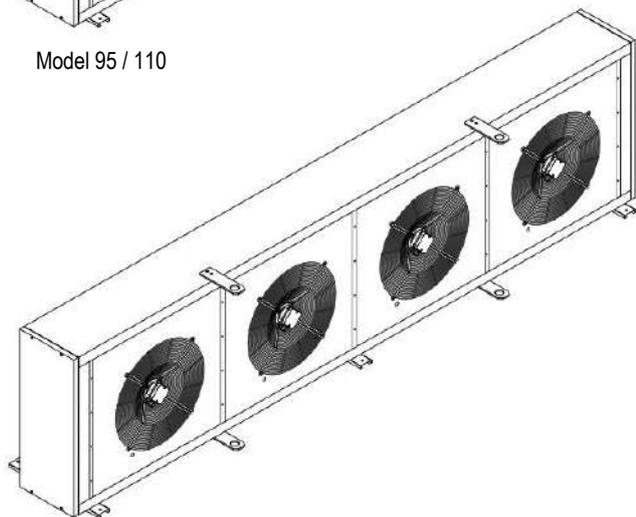

Model 25 / 30 / 35

Model 95 / 110

Model 45

Model 130 / 140

## MAIN COMPONENTS

### FRAMEWORK

- Base, self-supporting frame and panelling in steel plate with protective surfaces treatment in compliance with UNI ISO 9227/ASTMB117 and ISO 7253, and painted with epoxy powders.
- Colour: RAL 9002.
- Lifting eyebolts for models 95 / 110 / 130 / 140.
- Removable lateral panels.
- Lateral compartment for electrical panel with direct access to control and regulation devices;

### FAN SECTION

- Axial fans with sickle-shaped blades, fan guard and optimized for low noise levels.
- Electric motor with external rotor.
- Integrated motor thermal protection.
- Motor rotation speed control through a 0-10Vdc proportional signal.
- Protection grid on the fan air supply.
- IP54 enclosure class.

#### VERSION WITH AC ELECTRIC MOTOR – series DX-A

- Rotation speed control via external electronics

#### VERSION WITH EC ELECTRIC MOTOR – series DX-E

- Rotation speed control with integrated controller

### CONDENSING COIL

- Condensing coil in copper tubes and high efficiency aluminium fins, specifically developed to provide high heat transfer and lower pressure drops.
- The coil is supplied with seal charge.

### REFRIGERANT CIRCUIT

- Service Schrader valve on refrigerant inlet pipe. The valve can be used for the emptying of the sealing charge, the creation of the vacuum and the refrigerant charge operation.
- Welding copper connection on the gas inlet and liquid outlet manifolds.
- Valves on gas and liquid line for coupling to refrigerant pipe. The valves are supplied in mounting kit.

### ELECTRICAL PANEL

The electrical panel is positioned inside the condenser structure; remove the side panel to access.

Electrical panel in accordance with EN60204-1 norms, suitable for outdoor installation complete with:

- Terminals for power supply:
  - power supply - the power supply is independent of the indoor unit.
  - 0-10Vdc signal for fan rotation speed control - to be connected to the indoor unit.
  - alarm signal of the fans - to be connected to the indoor unit. The alarm signal is not available for condenser model DX-A B in standard acoustic version with optional P172 Kit for air -45°C axial AC.
- Electronic phase-cut regulator for fans speed control, only for condenser model DX-A B and DX-A L.

## OPTIONAL ACCESSORIES

P682.....	<b>Cu/Cu condensing coil:</b> Condensing coil with copper tubes and copper fins.
P683.....	<b>Cataphoretis condensing coil:</b> Condensing coil with additional Cataphoresis protective treatment.
P684.....	<b>Blygold® condensing coil:</b> Condensing coil with additional Blygold® protective treatment.
P172 (1) .....	<b>Kit for air -45°C axial AC:</b> Only for condenser DX-A B in standard acoustic version. Kit for operation with ambient air temperature from -20°C to -45°C.
C628000004.....	<b>Legs for vertical air flow (kit):</b> Support legs for vertical air flow supplied in assembly kit. Models 11 / 14 / 17 / 20.
C628000005.....	<b>Legs for vertical air flow (kit):</b> Support legs for vertical air flow supplied in assembly kit. Models 25 / 30 / 35 / 45 / 50 / 60 / 70
C628000006.....	<b>Legs for vertical air flow (kit):</b> Support legs for vertical air flow supplied in assembly kit. Models 95 / 110 / 130 / 140.
9973 .....	<b>Wooden cage packing:</b> The machines are delivered on wooden pallet, covered with shrink wrap and packaged in wooden cage.

### **WARNING**

The Manufacturer reserves the right to accept the matching of the optional installed on the machine

### **MANDATORY COMBINATIONS OF ACCESSORIES FOR MATCHING TO MEHITS S.p.A. AIR CONDITIONERS**

1. When optional accessory "P172 Kit for air -45°C axial AC" is present, it requires mandatory accessory "P191 Power supply for condenser" for the indoor units.

1. Referred to condensing temperature at 50°C and ambient air temperature at 35°C.  
The units highlighted in this publication contain <HFC R410A [GWP<sub>100</sub> 2088]> fluorinated greenhouse gas

## REMOTE CONDENSERS WITH AXIAL FANS WITH “EC” ELECTRIC MOTORS – series DX-E

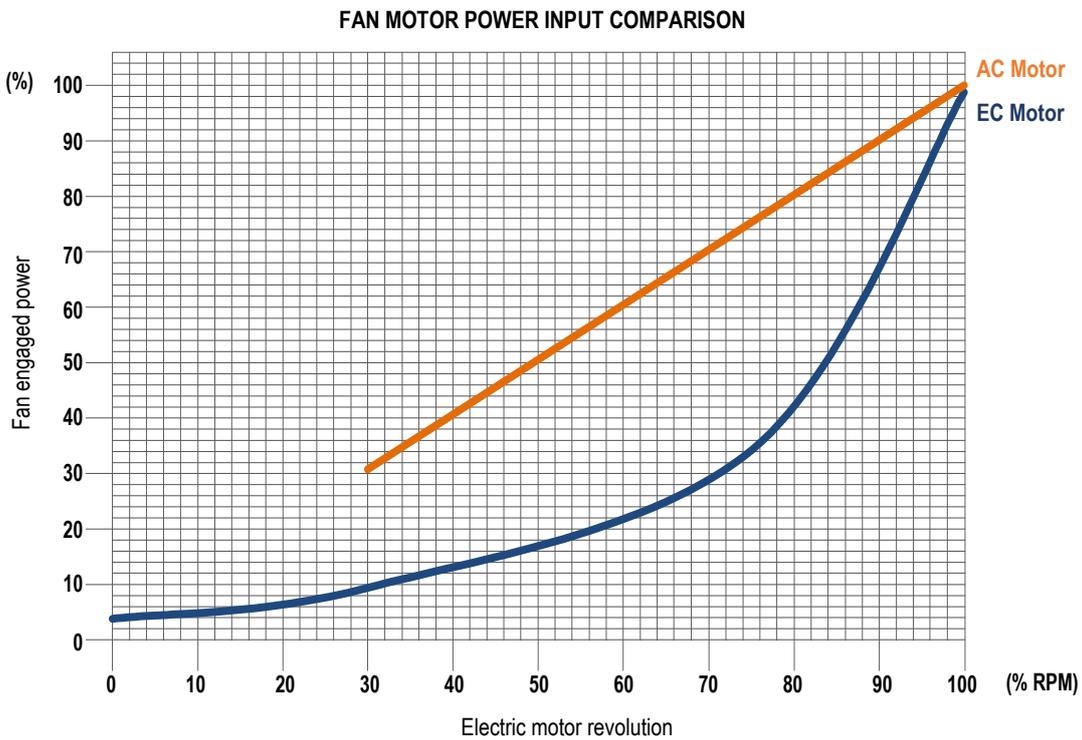

The “EC” axial fans are equipped with a brushless type synchronous motor with integrated electronic commutated system.

The motor rotation control is obtained with the EC system (Electronic Commutation) that manage the motor according to the 0÷10V proportional signal coming from the microprocessor control.

Characteristics of “EC” motors:

- no electromagnetic noise
- efficiency 83÷86%
- minimum power input

Characteristics comparison between an “AC” asynchronous electric motor with phase-cut control (voltage controller) and “EC” brushless type synchronous motor.

**WARNING**

The graphs are referred to working condition with null available static pressure (0 Pa).

## REFRIGERANT CHARGE

The condenser is supplied with seal charge. **Refrigerant must be charged.**

The following table shows the refrigerant charge for the condenser only; the indoor unit, the connections pipes and optional are excluded.

MODEL		11	14	17	20	25	30	35
REFRIGERANT	mm	R410A						
Refrigerant charge (1)	kg	0,8	1,2	1,7	1,7	2,0	3,0	4,0
F Gas - CO <sub>2</sub> equivalent	t	1,67	2,51	3,55	3,55	4,18	6,26	8,35

MODEL		45	50	60	70	95	110	130	140
REFRIGERANT	mm	R410A							
Refrigerant charge (1)	kg	4,7	4,1	5,5	7,7	8,7	11,6	11,6	15,4
F Gas - CO <sub>2</sub> equivalent	t	9,81	8,56	11,48	16,08	18,17	24,22	24,22	32,16

1. Refrigerant charge required for the condenser operation only. Internal unit, connections pipes and optional are excluded.

## RECOMMENDED REFRIGERANT LINES

Diameter of the recommended refrigerant lines for connection to MEHITS S.p.A. air conditioners and referred to "EQUIVALENT LENGHT". Please always refer to the "INSTALLATION DIAGRAM" to properly select all necessary components. Verify the need to use pressure limiting devices (safety valves) where not already provided for by Directive 2014/68 / EU.

**Nominal diameter: Refrigerant connection of the indoor unit. In some cases, the diameter of the refrigerant lines may not correspond with the nominal diameter. This is completely normal. It is enough to provide a reduction fitting to adjust the diameter.**

## "SI" INTERNATIONAL SYSTEM PIPES DIAMETERS

## INSTALLATION DIAGRAM

### WARNING

It is necessary to provide the refrigerant charge for the connection pipes and for the remote air-cooled condenser. Charge refrigerant in the suitable quantity and lubricant oil in 10% ratio of charged refrigerant. Lubricant oil must be the same type as the charged one as shown on the compressor plate.

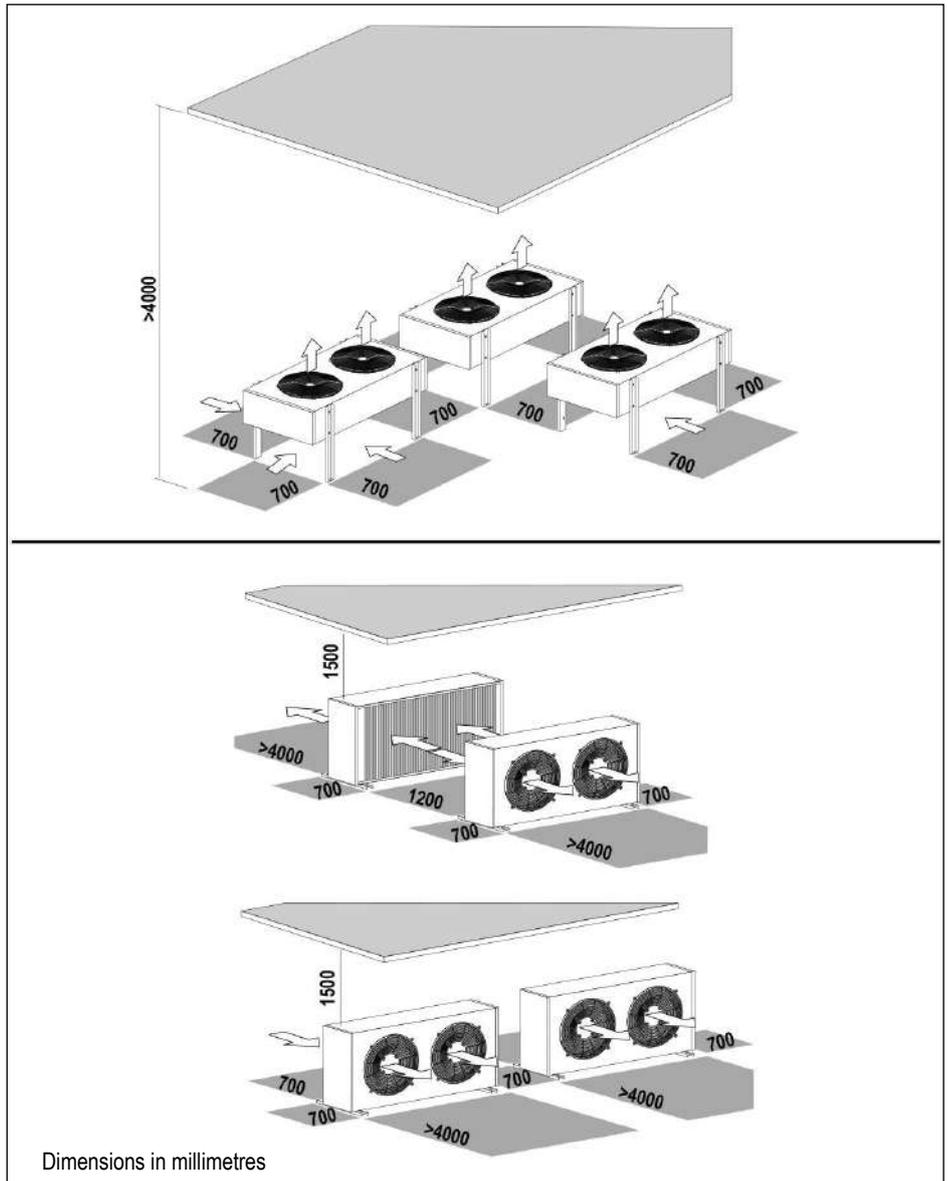

## RECOMMENDATIONS FOR INSTALLATION

The machine must be placed in an access area only allowed for OPERATORS, MAINTENANCE TECHNICIAN and TECHNICIANS; otherwise it must be surrounded by a fenced perimeter placed at least two meters from the external surfaces of the machine.

**Avoid suspended wall or ceiling installations.**

### CLEARANCE SPACE

Ensure adequate clearance spaces as indicated in below.

### INSTALLATIONS IN ZONES WITH STRONG WINDS

Installation in areas protected by the wind is necessary in order to avoid that dominant winds and air recirculation can interfere with the operation of the fan and the condensation control.

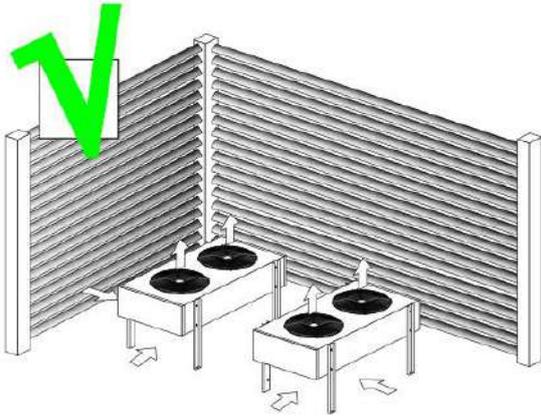

IF IT WAS NOT POSSIBLE TO INSTALL THE CONDENSER IN AN AREA PROTECTED BY THE WIND, WE RECOMMEND INSTALLATION WITH VERTICAL AIR FLOW.

### Machines with horizontal air flow

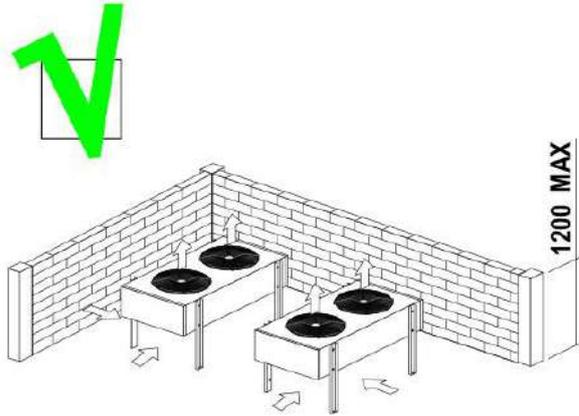

Strong winds (over 50 km/h) generate very high forces on the machine structure. It is therefore necessary to contrast these forces with appropriate anchors to the supporting structures.

**OBSTACLES TO AIR CIRCULATION**

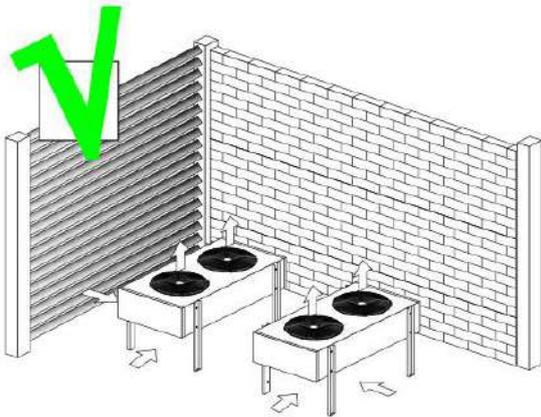

The air expelled from the machine must be easily dispersed in the environment.

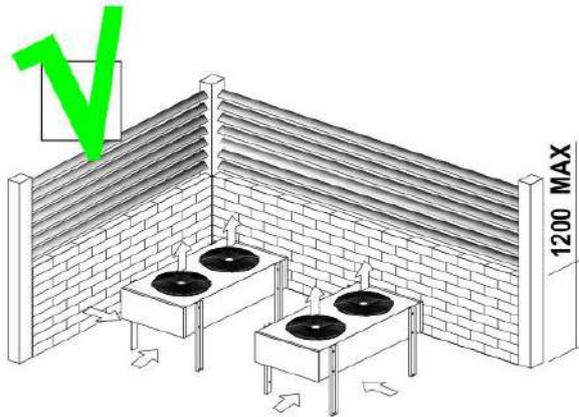

Perimeter structure with grating.  
No height limits.

Walling perimeter structure.  
Height limit of 1200 mm.

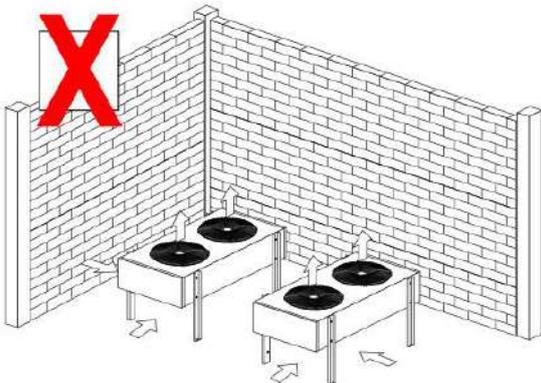

A very high walling structure is permitted but must be present a very wide finned barrier

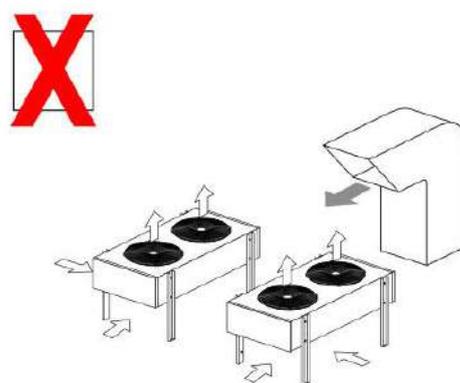

In case of walling perimeter structure with height limit of 1200 mm  
The grating can overcome the wall.

Dimensions in millimetres

**PROHIBITED TO SURROUND THE INSTALLATION WITH A WALL HAVING HEIGHT OVER 1200 mm.**

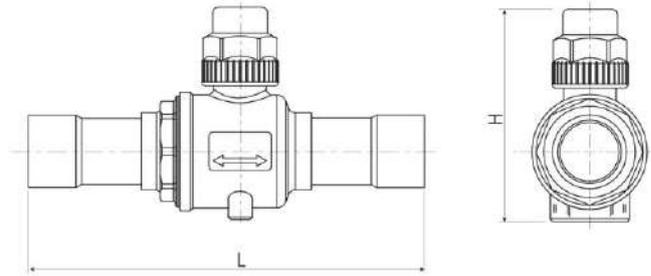

**AVOID THE INSTALLATION OF THE MACHINE IN THE DISCHARGE AIR FLOW OF EXTRACTORS.**

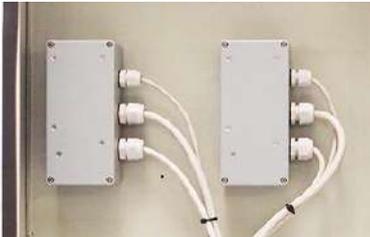

## STOP VALVES

Ball valves for refrigerant line. The valves are supplied in mounting kit.

## CONDENSING CONTROL

### UNITS WITH AXIAL FANS WITH AC ELECTRIC MOTOR

Units are equipped with electronic regulator for continuous variation of the rotation speed of the fan motor for condensing pressure control according to the 0÷10V proportional signal coming from the internal unit microprocessor control.

### UNITS WITH AXIAL FANS WITH EC ELECTRIC MOTOR

Units are equipped with external rotor EC type electric motor with step-less variable speed for condensing pressure control according to the 0÷10V proportional signal coming from the internal unit microprocessor control.

## POWER SUPPLY

The power supply is independent from the indoor unit.

The supply line must be equipped with all the protections and controls required by current regulations. If the condenser is powered from the indoor unit, the power line protections are already present.

## ELECTRICAL CONNECTION WITH THE INDOOR UNIT

The electrical connection with the indoor unit is provided by the installer:

- 0-10Vdc signal cable for the condenser fan speed control.
- Cable for condenser fan alarm signal. The alarm signal is not available for unit model DX-A B in standard acoustic version with optional P172 Kit for air -45°C axial AC.
- Possible power supply of the condenser if provided on the indoor unit.

### OPTIONAL ACCESSORIES: P682 – CU/CU CONDENSING COIL

Finned pack and tubes made of copper.

This type of heat exchanger is free from galvanic corrosion thanks to the use of a single material used for its construction.

Advantages of the Cu/Cu heat exchanger:

- High thermal conductivity;
- High corrosion resistance;

To ensure correct machine operation and the best operating conditions, it is important to keep the exchangers clean and efficient as indicated in the Installation, Use and Maintenance manuals.

The special Cu/Cu execution does not exclude maintenance and cleaning operations of the exchangers.

### OPTIONAL ACCESSORIES: P683 – CATAPHORESIS CONDENSING COIL

Electrodeposition process with epoxy resin.

The coating is applied through a complete immersion in the tank, in which the coil behaves like a magnet, attracting the coating on every point of its surface.

Advantages of the Cataphoresis protective treatment:

- Cathodic deposition which guarantees 100% coating of the exchanger;
- 1-2% exchanger efficiency loss
- Thick protective film thickness at each point of the exchanger;
- Flexible and resistant protective film;

To ensure correct machine operation and the best operating conditions, it is important to keep the exchangers clean and efficient as indicated in the Installation, Use and Maintenance manuals.

The protective treatment does not exclude maintenance and cleaning operations of the exchangers.

### OPTIONAL ACCESSORIES: P684 - BLYGOLD® CONDENSING COIL

Coating of the coil with polyurethane resins and aluminum pigments applied with spray painting.

Advantages of the Blygold® protective treatment:

- Spray painting of finned pack, frame and manifolds;
- 0,5-3% exchanger efficiency loss;
- Resistant to chemical and atmospheric agents;
- Resistant to high temperatures;

To ensure correct machine operation and the best operating conditions, it is important to keep the exchangers clean and efficient as indicated in the Installation, Use and Maintenance manuals.

The protective treatment does not exclude maintenance and cleaning operations of the exchangers.

### OPTIONAL ACCESSORIES: P172 - KIT FOR AIR -45°C AXIAL AC

The optional is available only for condensers DX-A B in standard acoustic version with AC electric motors.

The system is necessary for the correct machine start up and operation with very low ambient air temperatures between -20°C and -45°C.

Electrical connection to the condenser terminals at Installer care:

- Power supply cord (regulated voltage) from the terminals of the indoor unit;

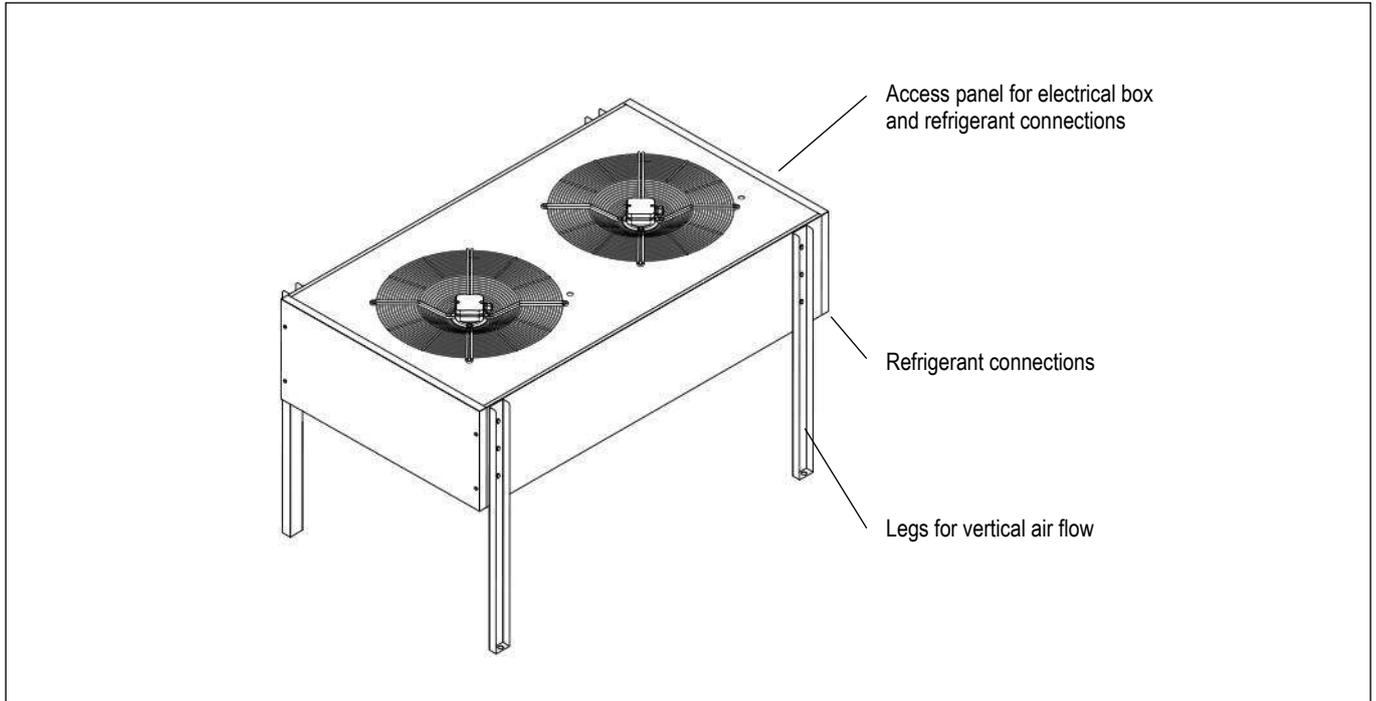

With the optional P172 the condenser fans alarm signal is not available.

Please refer to the unit wiring diagram for connections.

# BVE2 DX

## OPTIONAL ACCESSORIES: C628000004 / C628000005 / C628000006 - LEGS FOR VERTICAL AIR FLOW (KIT)

The units can be supplied with supporting legs for a vertical airflow.  
 The supporting legs are supplied in mounting kit, with the necessary hardware.  
 The installation of the support legs is the responsibility of the Installer.  
 Always fix the unit to the floor

## SHIPMENT: PACKING DIMENSIONS

Values referred to basic machine. The presence of some accessories increases the weight of machine. The machines up to model 45 included are shipped on pallet, covered with cardboard and shrink wrap. The machines from model 60 to model 280 are shipped on pallet and covered with shrink wrap.

		STANDARD PACKING FROM MODEL 14 TO MODEL 45					FROM MODEL 60 TO MODEL 280							
<b>MODEL</b>		<b>14</b>	<b>20</b>	<b>35</b>	<b>45</b>	<b>60</b>	<b>70</b>	<b>110</b>	<b>140</b>	<b>210</b>	<b>280</b>
